ON UNITED STATES

Renewed assurances regarding the protection of the rights of foreigners in the southern republic, all along the chief stumbling block in the way of recognition of President Obregon by this Government, have been sent to Washington and apparent-REPARATION PLAN ly have been received here as an important step in the right direction.

The views of Washington on the subject have been made known to Charge Summerlin of the American Embassy in Mexico City and discussions are in progress which are ex-pected to lead to a public announcenent within a few days. Ever since 1921 a draft treaty pro-

posing a renewal of good relations between Washington and Mexico and involving recognition of the Obregon régime by the United States, has been Mr. Summerlin's hands awaiting signature at the moment satisfactory guarantees have been given in regard to American rights. Whether that time has come officials here will not

It is known however, that legislation pending in the Mexican Chamber of Deputies, designed to so apply Article 27 of the Mexican Constitution ment. His information comes from that it will not be retroactive, is regarded by Obregon officials at least as embodying the sort of guarantee the United States has requested. That opinion has been made known to this all the more reason why an attempt Government through the Mexican embassy here in a comprehensive re-establishment of the whole Mexican

For many months the controversy, which has prevented recognition, has revolved about Article 27, which has perfect about Article 27, which has and Louis Barthou, the French deleben regarded here as confiscatory of American holdings in Mexico unless It will be found that M. Delacroix's the recognition of the properties of the propertie it were so interpreted as to exclude ideas by no means correspond with any possibility of its application rethose elaborated on the French side.

any possibility of its application retroactively.

Without that positive interpretation, it has been felt the article might easily be invoked to cancel American concessions granted before the Constitution was adopted.

President Harding has been fully informed by Chargé Tellez of the Mexican Embassy regarding the latest moves at Mexico City.

In great difficulty is the interallied debts, and unless they can be swept away it would appear that France is prepared to stick to the 132,000,000,-000 gold marks provided in the schedule of payments.

Nevertheless, M. Poincaré is doing all that is possible to reduce the debt to 50,000,000,000.

English and American Attitude

Recognition Draws Nearer

WASHINGTON, April 21—The Administration has reason to believe that conditions in Mexico are getting better every day, it is said at the White House. This is all at the conditions in Mexico are getting that there is a considerable prospect of M. Poincaré declaring that if the C. bonds are declaring that if the C. bonds are said at the conditions in Mexico are getting that if the C. bonds are declaring that the conditions in Mexico are getting that the conditions in the conditions in the conditions in the conditions are getting that the conditions in the better every day, it is said at the white House. This is interpreted as indicating that recognition of Mexico debts, France will not renounce the debts, France will not renounce the land friendly, turn about to France and friendly, turn about to France will not renounce the land friendly, turn about to France will not renounce the land friendly, turn about to France will not renounce the land friendly, turn about to France will not renounce the land friendly, turn about to France will not renounce the land friendly, turn about to France will not renounce the land friendly. statement by dispatches from the menace to Germany but it is also uation in general. Lord Buskmaster legislative reform project submitted meant to induce both England and had labored through a gloomy but by by the Obregon Administration to the mber of Deputies last December has been approved.

ing 82,000,000,000, were canceled, then France would ask Germany to This project was prepapred by the Department of Industry, Commerce and Labor, of which Alesco Robles is the raise 40,000,000,000 to 50,000,000,000 in satisfaction of other claims almost immediately, that is to say, over a head, and had the full approval of period of five to 10 years. Obviously, President Obregon. It was submitted so nearly the end of the regular ses-sion of the Mexican Congress that it it will be utterly impossible for Germany to borrow. No lender would could not be considered then. Presithink his money safe while German dent Obregon therefore called an extra liability was so high, and the French in the Ruhr with bayonets to obtain consider the project and a spirited debate on its various phases payments, not for the lender but for for themselves. been in progress for some six or eight weeks.

Validity Recognized

The bill, as received here textually some time ago, states that the Mexican not asked to pay its war debts. France Gevernment will recognize the validity of petroleum property rights acquired prior to May 1, 1917, and will confer such rights indefinitely. Inividuals or firms claiming such rights, however, must present them for confirmation within a period of 180 days from the enactment of the bill.

In fact, every effort was made by the representatives of those organizations to obtain from Congress some relaxation of the stringent restrictions of the quota act dur-ing the months of January and Feb-The ideal labor from their standpoint is when there is a large pool of unemployed waiting at their gates.

The New York World has expressed the matter quite tersely in an editorial published last December, which reads, in part, as follows:

"The object is frankly to increase the supply of common labor in order to keep down the wages of common labor. It is a plea for the treatment of labor as a commodity used in manufacturing. It is an argument that labor is one of the raw materials of industry and should be put on a free

Unions See No Shortage

There are several angles of approach to this question of immigration in relation to labor supply, and not all American industrialists are en rapport with the extreme view attributed in the editorial. A report of the immigration committee of the New York Chamber of Commerce, adopted by that body last December, reiterates its previous declarations that the national interest will no longer tolerate un-

The very claim that there is a shortage of labor in the United States is combated by the American Federation of Labor and other labor organizations, and the industrialists' arguments for relaxation in the present laws have been strenuously contradicted by representatives of various organizations for the restriction of immigration which have been in existence for many years.

The occasion appaled to me deeply. Because, like your forefathers in 1776, my brothers now are carrying on a struggle for the same purpose—
to win their independence.

Turks Are Behind Us: There We Stand!" Warns Admiral -Capitulations Decried

Special from Monitor Bureau NEW YORK, April 21-"Turkey will not tolerate the capitulations. It will win its complete independence from European control." These were the sharp notes struck at the dinner given in honor of Ibrahim Fuad Bey, with Colby M. Chester, Rear Admiral U. S. N., retired, as one of the principal speakers, at the Hotel Astor last

In his first public address since the ratification of the Angora Assembly, Admiral Chester gave little or no in-formation as to the approximate nature and scope of the concession. He even admitted that he knew little about the provisions of the measure passed a few days ago at Angora. But he emphasized the determination of the friends of Turkey in America to "stand by it to the end" and to "fight

for the concession against all comers."
Fuad Bey, as the guest of the Federated American Chambers of Commerce of the Near East, emphasized Turkey's determination to vindicate its complete freedom of internal ac-LAID TO ALIEN BAR tion, even to the extent of sustaining the Chester concession in the fact of all foreign assaults.

Turks to Assert Rights

"A country whose rights of govern-

But it was left to M. K. Zia Bey, their forces. Speaking freely, Zia Bey

The capitulations include freedom from taxation, the right to trial by consular authorities and the establishment of foreign post offices on Turkish soil. The capitulations had their begin-ning in the good will of an early Turk-ish Government toward foreigners who had come to Turkey to do business. It included in the beginning only freedo from taxation.

The Ottoman Government welcomed

oreigners. It wished to convince them of its extraordinary good will. It there-fore renounced the right to impose upon them the taxes which it collected from all Turkish subjects.

Privileges of Foreigners

Out of this voluntary gift foreigners gradually built up in the course of the centuries rights of extraterritoriality, which had the effect of denying in ag-gressive and adequate fashion the au-thority of the Turkish Government upon

one of the lengths to which the for-eigners so cordially welcomed by the early sultans resorted. Another was the right to try foreigners, not before the Turkish courts, but before courts of their own consular authorities. For reasons which I cannot review here, but which everyone familiar with past of Turkey well knows.

cessive governments at Constantinople submitted to these material invasions

interest will no longer tolerate unregulated immigration comparable to that which developed prior to the outbreak of the European war and calls upon Congress to prescribe in greater detail the tests for fitness to make an immigrant eligible to entry into the United States.

Constitution and will take every necessary step to meet this attack.

At the same time the Department of State today disclosed that conversations were now under way between this Government and Great Britain to

Canfield Report Filed

It was stated at the White House that the problem of dealing more effectively with rum smuggling was the chief topic discussed at the meeting of the President with his Cabinet. Although no definite program for accomplishing this purpose has as yet been decided upon, it was inferred that the Navy Department would be called upon to assign a fleet of fast submarine chasers to the work of patrolling the coast line for rum runners.

Roy A. Haynes, federal prohibition commissioner, today received from Palmer Canfield, prohibition director for New York, a preliminary report of his "review" of the rum fleet operat-ing off the coast of New York and New Jersey. Mr. Canfield appeals for fast boats to combat the runners.

This issue was raised when the American Government inserted in its ships to foreigners the clause whereby the purchasers agree not to use the vessels to smuggle liquor or other goods into this country, under penalty of forfeiting the ships without com-pensation whenever and wherever

Under this clause the American Government contends it would be acting within its rights to seize a ship violating it, even if the ship should be on the high seas.

Communication Made Public

Charles E. Hughes, Secretary of ment within its own territories are State, made public the contents of a limited by foreign dictation is not an letter sent by him to an unnamed independent country," pointed out the inquirer, reviewing the efforts of this former member of the Angora Cabinet Government to reach an agreement and now a member of the Assembly. Government to reach an agreement "Therefore Turkey does not intend to with Great Britain that would enable the American authorities to go beited by any foreign power or group youd the three-mile limit to capture of powers," was the summary of his British ships supplying rum runners with the contraband.

The communication reviews the suit to have set aside the ruling of the Attorney-General that foreign ships could not legally transport alcoholic liquor for beverage purposes within the territorial waters of the United States. This case is still pending in the United States Supreme Court. Replying to the question of his in-

quirer as to the seizure of ships outside the three-mile limit engaged in the smuggling of slaves into this country nearly 100 years ago, Mr. Hughes declared that the action taken by the United States and Great Britain at that time could not serve as a precedent for this country to go out now and seize rum smugglers.

Although the President was repreented as not having quite determined upon the line of action that would be taken, it was inferred he would follow the recommendation of Roy A. Haynes, Federal Prohibition Commissioner, that submarine chasers be assigned to the "dry navy" by the foreign post offices on Turkish soil was line, where smuggling is particularly pernicious.

Propaganda Hinted

Mr. Haynes has consistently claimed that the amount of liquor being smuggled into the United States was greatly exaggerated, and he attributed such reports as being the work of the wet interests in their campaign to break submitted to these material invasions of their authority. Turkey came to mean one thing to Turkish subjects and another thing to foreigners living smuggling that is going on; that his smuggling that is going on; that his ships were not fast and numerous enough to apprehend the rum runners. At present the coast guard and customs services are aiding the prohibi-

tion unit in the warfare against lawbreakers, it being a part of the duties of these two organizations to prevent smuggling into the United States. But their vessels were said to fall short of requirements. The navy has standing which would soon overtake a rum

Treaty Comes Up Again

It was not revealed at the White House what success had been attained in the negotiations with Great Britain on the question of the American au-thorities being allowed to go beyond the three-mile limit to apprehend foreign ships hovering there for the obvious purpose of aiding in the thwart-ing of American laws. The object is a treaty whereby Great Britain would be allowed to go out beyond the three-mile limit to search American

Scot Distillers Make Thousands as Rum Runners Break Contract Special from Monitor Bureau

NEW YORK, April 21-The so-called rum fleet of New York having a complete signal service with the shore, knew days in advance that Palmer Canfield, federal prohibition director of New York, was planning a visit to the three-mile limit. Consequently 10 of the vessels fied to the waters Montauk Point and Block Island, where they are today. Canfield found six of the fleet riding at anchor off Sandy Hook. Movements of prohibition enforcement officials are known to the rum agents and fleet officers almost as soon as they are announced, usually before they become public, through "leaks'

and "underground wireless."

Joining this fleet of 10 boats lying Montauk Point and Block Island will be still other of the craft engaged in the same activity, for the um runners as a rule frown on such tactics as employed by the captain of the Istar, formerly Robert Goelet's yacht, Nahma, who exchanged doubtful pleasantries with the United States prohibition director, because his ves-

riding at anchor where agents are ble, the vessel came back to her old selling over the rail to the bootleggers and smugglers the alcoholic drinks barred in this country by the Consti-

Rum Ring Is Formed

The Istar has been in these waters for some time. Last fall a group of bootleggers of New Jersey headed by man (whose name the representative of The Christian Science Monitor learned from his former associates) having a working capital said to be \$500,000, formed an organization to deal in rum from the source. They had become dissatisfied with the prices charged them by the Nassau MALTING BARLEY

Once the decision to buy direct from the Scotch distillers was made, representatives were sent to Scotland headed by the New Jersey prime mover. In Scotland "a contact was made," as the bootleggers and rum runners call it, with some of the larger distillers. The Jersey man es-

In some quarters by enabling the coal tax in the occupied regions.

Press dispatches received here them to get a better price for their them to get a be three-mile limit of New York, it can barley, but this is denied elsewhere on surrectionists were well armed, and be readily seen what a tempting finan- the ground that the brewers gener- an attack on Oberhausen, an imporcial proposition this was to the ally insist on mixing a proportion of tant industrial city north of Mülheim. then were making a profit on the article, as they do with hops. While, original selling price of 60s, the case at the measure of imperial preference, it is three-mile limit.

Istar Loads 20,000 Cases

The whisky costs the distillers about \$5 or \$6 the case to manufacture and bottle and box for the market. They have been satisfied with the home price of \$15 or 60 shilings the case. The Jersey proposi-tion was for \$25 a case over the rail at the three-mile limit, New York, and deducting the freight the Scotch distillers were to get a net price of \$20 the case. On the 20,000 cases called

the case. On the 20,000 cases called for in the transaction the Scotch distillers would make a profit above the cost price of about \$252,000.

The deal was put through and the Istar was chartered for the trip. The reason for chartering a yacht of this type was that yachts under the shipping law of England sail under the Admiralty while cargo and passenger steamers sail under the regulations of steamers sail under the regulations of the English Board of Trade. Admiralty vessels can clear practically for the high seas while vessels under the jurisdiction of the Board of Trade must proceed under their clearance papers to a certain designation.

The Istar loaded 20,000 cases of

assorted Scotch whiskies and sailed last January for the "liquor bar" off Ambrose channel lightship, clearing for a cruise. In the meantime the Jersey man returned to the United States and became involved in a dispute with his partners in the rum ring, and some of them quit the group.

The Istar arrived off the three-

mile limit late in January, and lay at anchor for more than two weeks before the Jersey man and his associates came out to the vessel, which was waiting to discharge cargo. When the American rum runners came to the Istar they said they would pay but \$20 the case and not \$25 as bar-gained for. The supercargo of the distillers refused and the next day the Istar entered the regular rum

Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, 75c. Single copies 5 cents (in Greater Boston 3 cents). (Printed in U. S. A.)

Entered at second-class rates at the Post Office at Boston, Mass, U. S. A. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of Oct. 3, 1917, authorized on July 11, 1918.

ships for contraband and this country would be allowed to do the same on British vessels.

Registry Matter Discussed

There was also transmitted the fact that the State Department has taken up with the British Ambassador the matter of cancelling the British registry of vessels, which are found to be registered in Great Britain, when it is ascertained that the actual interest involved is American and that the vessels are used to singular liquor into the United States. The letter adds:

The department has also asked the British Ambassador to take up with

fleet, and the shore power boats of the bootleggers and smugglers came to the Istar for supplies when they could dicker for 50 cases, for the vessel would not do business on a smaller scale. The Istar, too, made rum runners angry when she would not sell unless they gave their real names and addresses. This may have been to get the names of probable regular customers, who could be addressed in the event of another rum voyage being run by the distillers. At any rate, it is said that the Istar has a list of 200 names of United States smugglers

and bootleggers in her possession. About Feb. 25 the Istar began to run short in supplies and coal, and she suddenly weighed anchor and steamed to Halitax for fuel and supplies. There the head of the Jersey rum group followed her and libeled her, claiming sel was flying a foreign flag.

The Istar is equipped with wireless, but the power boats bring all the news of liquor violating and events and paid for out of the proceeds of and paid for out of the proceeds of the proceed of the proceeds of the proceeds of the proceeds of the proceeds the trip, which had been quite profitaanchorage off the Ambrose Channel Lightship, where Palmer Canfield hailed her on his Thursday trip of

The Istar's mate refused to say how many cases of whisky he had aboard when asked by Mr. Canfield. She sailed in January, it is said, with 20,000 cases. On Tuesday, April 10, the supercargo of the Istar told The Christian Science Monitor representative that she had sold all but 2000 cases and last Thurs-day the best estimate is that she had about 1100 cases yet unsold.

DUTY ANNOUNCED

British Brewers Agree to Bear the Burden

By Cable from Monitor Bureau LONDON, April 21-In the House of tablished his financial standing with the distillers and told them that if they would send a cargo of whisky to the three-mile limit off New York, the Jersey ring would take the entire boatload at \$25 a case.

The derivative of the foreign malting barley, with a preference of one-third on barley imported from the dominions. The new duty is part of the bargain with the browers. By shipping whisky this way direct part of the bargain with the brewers from Scotland it became unnecessary in connection with the reduced beer for the distillers to pay the 24s. a tax in this year's budget and "the case duty at Nassau which meant a trade" has undertaken to pay it from saving of about \$6 on each case. profits without passing it on to the

cotch distillers, inasmuch as they foreign barley with the home-grown is momentarily expected. Late reports possible to argue that it is not protection, which the present Government is bound by its election pledges

not to introduce. In any case no protests have been raised against it yet on that score and as the duty will come directly from the brewers pockets and they have agreed to it, support for the proposal is likely to be general.

The Longworth Ring

One of the Most Beautiful Rings Ever Made

Set with larger diamonds \$175, \$250, \$350, \$500, \$750

Diamonds are finest white-perfectly flawless. The setting is all hard platinum, entirely made by hand.

The shank shows a small diamond on each side and is beautifully carved.

The design is exclusively our own and is drawn as delicately as a spider's web, exhibiting the high-est type of platinum craftsmanship.

If you have three diamonds in an old setting, let us mount them as illustrated. The new ring will be a revelation. OPEN A CHARGE ACCOUNT

Matters, to Avoid Pitfalls

By FREDERIC WILLIAM WILE

WASHINGTON, April 21—In one Angora for the last six months, and form or another, the vast Chester con- fron Capt. Arthur Chester, Admiral cessions in Turkey will be brought Turkey with the concessions in his before the resumed Lausanne confer-before the resumed Lausanne confer-pocket.

The original grants were made by of that expectation, Charles E. Hughes
Secretary of State, has sent an official
of the solicitor's division of the State of the solicitor's division of the State informed the State Department that Department to join the American delegation of "unofficial observers." He will act as a special emissary of the general knowledge that the concessions comprehend extensive rights for oil, railroads, port facilities, town-building and other important ecoters and transmit in detail the Secre-

tary of State's instructions. The American representatives at Lausanne will not themselves bring up the Chester concessions, for officially these are not yet a direct concern the United States Government. In either of at least three different ways. however, they are bound to come promptly to the surface. General Pelle, the French High Commissione mit them to arbitration. Such a at Constantinople, who will be at declaration would only follow indis-Lausanne, may be expected to submit to the conference the formal protest putable proof that the concessions the American concessions which he has already launched.

Turks May Ask Discussion The British and the Turks are in controversy over the Irak (Mesopo-ence, when an issue arose with Great tamia) mandated-area boundary, Brit-Britain over certain American oil new conference will demonstrate controversy over the Irak (Mesopoain claiming that it extends to a line which would include the Mosul oil-fields. The Turks have not conceded such a boundary and in the meantime such a boundary and in the meantime such a boundary and in the meantime such as to arbitrate. Precisely the same program will be pursued if the Cheshave given to the American group concessions which embrace Mosul. So if neither the French nor the British attack the Chester grant at Lausanne, the Turks may call it up for discussion. They have an arrangement with Great Britain for referring the Mosul dispute to the League of Nations if it has not been settled within a year. Lausanne falls within the year and Ismet Pasha may say: "Eventually, why not now?"

The Harding Administration, fully alive to the political criticism to which it would otherwise expose itself, is determined not to let any advocacy of the Chester rights embroil the United States in a diplomatic "entanglement" at Lausanne or in serious "involve-ments" at all. The first thing that has to be ascertained is whether the Chester group has any "rights," in any incontestable legal sense. The American Government is not accustomed to support "claim-jumpers.

Coples of Grant En Route Secretary Hughes will lift no finger the capitulations. to espouse the cause of Admiral Chester and his associates until he is assured they have strong legs to stand on. That will not be definitely known until certificated copies of the

PROHIBITION HOPES **REST IN ASTOR BILL**

Defeat of Scrymgeour Measure in House of Commons No Surprise

By Cable from Monitor Bureau LONDON, April 21-In a speech, of which the manifest sincerity and re- Government; the Turkish Government ligious feeling attracted warm plaudits is behind us; there we stand, and from all shades of opinion, Edwin we'll fight it out on that," said Rear Scrymgeour moved the second reading Admiral Chester. of his prohibition bill in the House of Commons yesterday. The rejection "The last 10 days have been the of his proposal by 236 votes to 14 most eventful days of my life," said probably did not surprise him and the Rear Admiral, "but I had to come need not be taken too seriously by friends of temperance. There are many, both in Parliament and out, who are working for the disappearance of alcohol quite as earnestly as Mr. Scrymgeour, but who consider it inadvisable to try to force prohibition

on the nation Such people did not feel themselves able to support Mr. Scrymgeour's pro-posal, preferring to advance more slowly, but perhaps also more surely, along the less spectacular lines indicated in Lady Astor's local option bill last autumn and her other temperance measure restricting the sale of alcohol to persons under 18, which has a good prospect of passing into law during the present session. Thus it came about that the bill for complete pro-hibition could find few supporters, although many members abstained from

voting against it. Mr. Scrymgeour and his little band undoubtedly came off with flying col-ors in the debate, so far as argument went. Their facts and figures regarding the effect of prohibition in the United States, even if they did not persuade the House that the time was ripe or similar measures here, at any rate effectively countered the tales of illicit stills, bootlegging and widespread intemperance, extending to 90 per cent of the population, brought forward by the bill's opponents.

Those who voted for the bill were one Ulster Unionist—Sir William Allen-and 13 Labor members, all of them representing Scottish or Welsh constituencies. Dr. Salter, who seconded the measure, is a medical prac-titioner and the Labor member for Bermondsey, London: While many Labor members voted against the bill, there was also a large number of this party among those who abstained from

The Labor Party today is perhaps the most prominent section of the House of Commons in its active demand for temperance reform and is strongly critical of the proposed reduction of the beer tax designed "to give the working man cheaper beer." The party's election manifesto de-The party's election maintesto de-lared them in favor of "control of the dquor traffic according to the people's fil," and the way in which the majority of this party has supported Lady Astor's efforts to this end is a hopeful augury for the future, to abandon the Sevres treaty pro-visions for allied domination of the

Turks Win Points

The Turks first whittled down the Sèvres indemnity from \$180,000,000 to \$75,000,000 and then wiped it out altogether. 'They coerced the Allies into yielding up the "capitulations," whereby foreign powers would maintain their own courts, and accepting in-stead a system whereby the Turks, for all practical purposes, become com-plete masters of the judicial system in Turkey. Instead of maintaining their mandated-area claims to a boundary stretching over Mosul, the British suc cumbed to a Turkish proposal to let the League of Nations decide that

Finally, instead of agreeing to a treaty with "economic clauses" which were an intolerable infringement upon If and when France or Great Britain their sovereignty and dignity, the Allies agreed to an arrangement challenges the legitimacy of the whereby their nationals shall deal directly with the Turkish Governmen delegation at Lausanne will promptly for regulation of pre-war commercial announce American readiness to suband financial privileges.

CHESTER GAUNTLET IS FLUNG AT EUROPE ON OIL CONCESSION

(Continued from Page 1)

Ready for Arbitration

Chester concessions, the American

ter deals provokes opposition.

The Turks are returning to Lau-

sald if, after their victory over their enemies in 1776, some foreign power or group of powers had claimed the right to establish their own post offices, their own courts and their own police authorities in America?

Would they have accepted such a construction of the word independence? Neither will Turkey in the present situation. At Lausanne, at the coming conference, its delegates will refuse to the last extremity the effort of the European powers to maintain their European powers to maintain their hold upon Turkey's life through that instrument of humiliation for Turkey,

Admiral Takes Aggressive

In his address Admiral Chester made an emphatic attack on the declared to be worth \$1,000,000,000, he capitulations. "I shall bring it to the said he was ready to "fight fair," but concession are in hand. These are en route to Washington through two channels from the American Consul who has been on "unofficial" duty at I am capable," said the Admiral, "that the case of the Kurds of the Mosul district he declared to the Mosul the same act which gave America the district, he declared, Lord Curzon had present concession made it necessary for America to lead the way for the abolition of the capitulations.

"As to the concession," he added "the Turkish Government is solidly behind us, and"—banging the table with his hand—"we shall resist every attempt from any quarter to prevent its being carried out in all its details." And Dr. Fuad Bey added (Hamdi Bey, a New York electrical engineer, interpreting): "The Turkish Govern-ment will uphold the Chester conces-

sion to the last "I stake my interest on the Turkish

Loyalty to Turks Avowed

"The last 10 days have been the here tonight to tell Dr. Fuad Bey that there are some friends of Turkey who will stand by it to the end."

The Admiral admitted that he did not know himself what the Chester concession precisely contained at present.

After six committees of the Turkish Assembly had passed on its various clauses, adding here and subtracting there; he was not in a position to state, he admitted, what was left. "But this I do know," he said, "that no claims brought against them have a leg to

WERE lying on the grass by the grape vine, sucking big blue grapes. Philip was telling a story and carving round, wooden marbles with his jacknife.

"So the mouse took 5 cents out of about wherever we want."

"Under the grape vine," said we all together.

"I know," said Edward; "we'll build it here, but we won't attach it to the ground. So we can move it about wherever we want." build it here, but we won't attach it to the ground. So we can move it about wherever we want."

her handbag, and paid the giant's car-fare, and they sat on the front seat, handbag, and paid the giant's car, and they sat on the front seat, talked to the driver, and ate pops. And that's all."

"Goody, goody," shouted Janet, "and on windy days we'll take it up in a tree and live there." lollypops. And that's all."
"That seems a silly sort of story,"

said Janet. "Let's do something."

"What?" said I.

"Build a house," said Edward, who always thought of the most delightful climbed up and began the chimney.

"With bricks and wood and nails and shingles," said Philip. "It'll be big enough for us all to get in.

With a garage in back," said I. "And curtains at the windows and a rosebush in front," said Janet.

"And a chimney and a kitchen stove that I can mend every day," was what Edward wanted. "Now scoot after nails and bricks and wood and the door was too small. Philip hacked away a bit with his knife, but

even then I couldn't get in. Then we saw we'd made the house much too Philip got hails and two hammers from the tool house. Edward came puffing up with his wheelbarrow full small. It was only as high as our waists. look well, anyway," said Janet.
"We might all sit hunched up with

Wher'd you get them?" I asked. "I took the chimney off the dog kennel. Fido never builds a fire, so he doesn't need a chimney and we do.' I doubled up with laughter and went after wood. There was a fine pile behind the stable and I dragged "I knoy," said Philip; "let's give the house to the guinea pigs. They need more room. What do you think?" "Yes and they'll look so sweet peeking out from behind the cur-tains," said Janet. out two armfuls. Janet brought cur-tains from the bathroom and a pot of daisies from the nursery window. "A rose bush would take too long to grow," she explained. Now, where shall we build it?"

to the 1890 census, because it will cut

down the supply of those eastern and southern European races.

Giving his opinion why immigration among Nordic people has fallen off, Mr. Patterson said: "Because the English colonies offer bonuses to English people to settle the colonies and the colonies are colonies and the colonies and the colonies are colonies and the colonies and the colonies are colonies are colonies are colonies are colonies and the colonies are to Canada and Australia or New Zea land. A few years ago an immigrant paid \$10 to \$20 for a passage to the United States; now he pays \$80. A few years ago he was practically guaranteed a job on landing, but now the immigration authorities. the immigration authorities make it as hard for him as possible and with slight excuse presume that he is coming under contract. COLLEGE WOMEN BOOM FUND TO RESTORE LOUVAIN LIBRARY

Boston Meeting Thursday-Belgian Structure Will Memorialize American World War Veterans

With the desire to do all that they can to help restore the Library of Louvain University, the Boston branch of the American Association of University Women, has sent out cards for a meeting next Thursday afternoon at the house of Mrs. Robert Farley Clark, 29A Chestnut Street, Boston, as the first move to obtain the \$10,000 quota pledged toward the

Alls W. Foster, for many years a teacher on the staff of the Girls' High School. Any who are interested in contributing to the fund' and find themselves unable to attend the meeting next Thursday afternoon may send checks made payable to Miss Foster, addressing them to her home, Hotel Eliot, Roxbury.

EUROPE REVIVING,

SAYS MR. BARNES

Special from Monitor Bureau

NEW YORK, April 21—"We come back with the feeling that there is a great stirring in new quarters and self-support of those in the war. We found an extraordinary popular enthusiasm behind the Mussolini policy.

new peoples in the world," said Ju-lius H. Barnes, president of the Chamber of Commerce of the United States of America, at a dinner given by A. C. Bedford at the Metropo Club. The speaker recently returned

from an extended European trip with a delegation of the organization of which he is chief executive.

Mr. Barnes said, "In Turkey, we found a general confidence that peace would be made in definite terms and in the near future." He added:

indemnity due it from China. The United States moved in that direction

more than twenty years ago, suggesting to the Chinese Government that

the money should be devoted to Chinese education. The result was the

1924 and 1925 Conventions to Go to West-Miss Boyce Wins Presidency

KINDERGARTNERS

PICK MINNEAPOLIS

PITTSBURGH, Pa., April 21 (Special)-The annual convention of the International Kindergarten Union closed last night with a banquet to the 1000 delegates. Among those who spoke were Miss Lucy Wheelock, of Boston; Miss Caroline B. Aborn and Miss Caroline McCullough, St. Louis; Miss Annie Laws and Miss Elizabeth

Mies Ella Ruth Boyce, director of the kindergartens in the Pittsburgh public schools, was elected the president of the association at the closing business session held yesterday after-noon. She succeeds Miss Luella A. Palmer, director of kindergartens of New York City. The other officers selected were as follows:

First vice-president, Miss Caroline W. Barbour, Superior, Wis.; second vice-president, Miss Barbara Green-wood, Los Angeles, Cal.; recording secretary, Miss Mary G. White, Chicago; corresponding secretary and treasurer, Miss May Murray, Spring-field, Mass., and auditor, Miss Allen E. Seaton, Louisville, Ky.

Minneapolis, Minn., was chosen as the convention city for 1924. The convention will be held in the spring at a date to be selected by a committee of which Miss Harriet Niel of Boston is

chairman. Los Angeles, Cal., was practically chosen for the 1925 convention, to be held in July, when the convention, in-vited to give indication of its preference, responded practically unanimously for the trip to the coast for the convention in the summer. The I. K. U. silk banner for the largest visiting delegation was awarded to the property of the largest visiting delegation was awarded to the coast for the largest visiting delegation was awarded to the coast for the largest visiting delegation was awarded to the coast for the c Ohio, having 118 registered for the

Pittsburgh convention. Greetings to the convention were received from kindergarten organizations in Japan and Canada, and from the Froebel Society of London.

Following a speech by Miss Edna Dean Baker of Chicago, the convenion indicated it favored the organi-Boston and New York. The nominal zation's publishing its own magazine. which it was announced would be a combined primary and kindergarten magazine. Miss Mary C. McCullough, chairman of the board of education, St. Louis, reported a fund to erect an Froebel, originator of the kindergarten, has reached nearly \$3000, collected over a period of years in small amounts.

SHIP BOARD TO SEEK **BIDS WITHIN 14 DAYS**

Special from Monitor Bureau WASHINGTON, April 21-Announcement was made by the United States Shipping Board that within two weeks bids would be invited for the purchase of ships now being operated by the board on various trade routes.

Bids will be invited for the purchase

of ships for operation on consolidated routes, with a widening of the range of ports to be served both in this country and abroad. No vessels will be sold unless the purchaser offers sufficient guarantee to maintain the service for a term of years.

If sales are made under these conditions, the board gives notice that it long as the services contracted for are maintained.

abroad: advance notice of intention to settle permanently within our bor-ders is a reasonable and proper re-quirement, and the adoption of such a policy would unquestionably tend to prevent hardship and disappointment on the part of those selling their homes and crossing the sea only to find they cannot comply with the requirements of admission.

Again, James A. Emery, general counsel for the National Manufacturers' Association, which organiza-tion has taken the lead in marshaling the forces who favor greater flexi hility in the immigration law, said: "We would establish a high but in

telligent discriminating and practical standard of admission, plainly distinguished, however, for obvious reasons, from requirements of naturalization All tests of admissibility should be points of embarkation."

This theory of selection at the source is both plausible and persuasive, but it implies international co-operation, which so far has been lacking. European governments who have been apon the subject-informally of course-have clung to the old school their own borders would be an in-fringement of their sovereignty. Italy has even gone so far as to take diplomatic cognizance of the very prevalence of such a theory in America and hastened to repudiate it without waiting for the attention of their Government to be drawn to it through the

Italy Alarmed

Thus, in September, 1921, the royal charge d'affaires for Italy, presented to Charles E. Hughes, Secretary of State, a memorandum, attacking the proposition in the following language: "Such action, even if exercised in the interior of the consulate offices. would go beyond the usual consular functions recognized by treaties and . . . could not be considered as conforming with either treaty or law on emigration in Italy. It is true that this is a matter relating merely to proposed legislation; nevertheless, the intense desire to avoid later any possible motive for discussion between our two countries inspires the friendly intention of the present recommenda-

The Italian memorandum is the more highly significant because of the fact that the Government of that country is perhaps the most active of any in Europe in seeking outlets for its surplus population, and not long ago united States to seek for means whereby more Italian Nationals could gain entrance to the United States. To that end he crossed the continent and was in communication with many of the industrial leaders who are endeavoring to obtain a larger immigration to overcome the labor shortege He even made overtures to the American Federation of Labor to try and gain their favor for his enterprise, but in that he was unsuccessful.

"Rough Labor" Sought The kind of labor for which the transportation companies, mine opera-tors and manufacturers are clamoring is that which is classed as "rough labor"-men who are willing to do heavy, dirty work. They claim that Americans will not perform that kind of labor, and that the sons of aliens are seeking "white collar" jobs, and that even immigrants will not perform that kind of work after they have been in this country a few years. Consequently, since such labor must be performed as a necessary adjunct to industry, they declare that they re-quire a constant influx of immigrants who will not hesitate to perform "rough

The argument submitted by the National Manufacturers' Association is that unless rough labor is to be had the basic industries, many skilled

workers cannot be utilized, and Mr. Emery declared that already many departments in typical industries are not now in operation because it is impossible to find common labor to perform necessary preliminary operations. He even proposes going back to the system abolished nearly 40 years ago, by which immigrants might enter into contracts for employment before embarking for America.

ROOSEVELT MEDALS TO BE DISTRIBUTED

Memorial Association to Honor Three Annually Who Render Distinguished Service

NEW YORK, April 21—William Loeb Jr., former secretary to President Roosevelt, and now acting president of the Roosevelt Memorial Association, announces that the organization soon will present the first of the gold medals to be awarded annually for distinguished public service in those fields of activity that especially interested the distinguished American. The medals are to be 3½ inches in diameter and will bear on one side a profile of Theodore Roosevelt, and on the other, a fiaming sword with the inscription, "If I must choose between righteousness and peace, I choose righteousness."

The designer of the medal is James Earl Fraser, whose statue of Alexander Hamilton for the Treasury Department in Washington, D. C., will be unveiled in the near future and whose bust of Roosevelt in the Capitol, just outside the Senate Chamber, is well

The medal is to be annually awarded for the greatest service to the American people in three out of the following seven fields: (1) Administration of public office. (2) Development of public and international law. (3) Promotion of industrial peace. (4) Conservation of natural resources. (5) Promotion of the welfare of women and children. (6) The study of natural history and the promotion of outdoor life. (7) Development in the American character of those qualities of courage, foresight, initiative and patriotism associated with Colonel Roosevelt's name.

"This list is not necessarily final," said Mr. Loeb. "It is, as the lawyers say, subject to advice of counsel, the counsel in this case being the great American public. The trustees hope that the admirers of Colonel Roosevelt throughout the country will feel impelled to make suggestions."

The following committee has been appointed by Mr. Loeb to consider suggestions presented by the public and to designate the three men or women who have, in its judgment, rendered the greatest public service during 1922 in the fields already outlined here:

in the fields already outlined here:
John H. Finley, formerly head of the
New York State Department of Education, chairman; Mrs. Medill McCormick; Oscar S. Straus, Secretary of
Commerce and Labor in President
Roosevelt's Cabinet; Charles E.
Hughes, Secretary of State; Henry C.
Wallace, Secretary of Agriculture;
Gifford Pinchot, Governor of Pennsylvania, and Col. William Boyce Thompson, president of the Memorial Association. Announcement has it that the
first awards will be made in late May.

UNION OFFERS TO BUY 10 SHIPS

Proposes to Shipping Board That Committee Fix Price

Special from Monitor Bureau

NEW YORK, April 21—"We shall
make today a further offer to the
United States Shipping Board," said
Thomas B. Healey, business manager
of local No. 33 Marine Engineers'
Beneficial Association.
"We made an offer of \$300,000 cash

"We made an offer of \$300,000 cash for three ships, and that offer has been rejected on the score that it is too low. We now offer to take 10 ships. Our proposal is that on each ship we shall make a deposit of \$30,000; that we shall take over and operate the ships, making the necessary arrangements to cover any possible loss, by adequate insurance; that the price to be paid by us for the vessels shall be decided upon in one year; and that in that connection steps shall be taken for the appointment of a committee to arbitrate.

The association's aim is to obtain

a fleet of 110 ships.

"We have in our association a veritable wealth of experience in the practical working of ships," Mr. Healey said. "We would be in a position to out out expensive items. Let it be quite clear that this is not a question of Labor trying to grab for itself. We believe the co-operative plan will eventually take in all the workers in the marine trades; but the benefit to be derived from the scheme we have outlined will be a general bene-

TURK EDICT PORTENDS REFUGEE STARVATION

NEW YORK, April 21—A Constantinople dispatch to Near East Relief headquarters today states that the Turkish authorities have finally refused to permit the importation of relief supplies for 25,000 Greek refugees in Constantinople, either direct or through the Red Crescent, unless prohibitive customs duties are paid. The reason given is the insistence of the Angora Government that all these refugees must be removed to Greece immediately. The enforcement of this edict amounts to starvation of the 25,000 Greeks, relief officials say, for refugee supplies of flour and food in Constantinople will be exhausted

20,000 Greeks, relief officials say, for refugee supplies of flour and food in Constantinople will be exhausted about April 26.

Relief headquarters here said that the Constantinople office had instructions to refuse to pay any excessive customs duties and consequently food supplies were being held under customs guards, but that a few days ago Turkish soldiers, acting in defiance of their own Government's edict, had seized a quantity of food supplies out of the relief warehouse in Constantinople for distribution to the refugees.

An appeal has been made to the American Embassy in Constantinople to find a solution of the problem.

LABOR ACTS AGAINST FASCISM

NEW YORK, April 20—Resolutions calling upon labor organizations to fight every effort to introduce Fascism in the United States were unanimously adopted by the Central Trades and Labor Council here. A copy of the measure is to be sent to every Central Trades Council in the United States.

DECENT water colors by Childe

They are small and sparkling notations of the various nooks and corners that a tour of the New England states, with a digression or two into New York, would yield; some show such notable places as Portsmouth with its world-benear and Poet New York, would yield; some show such notable places as Portsmouth with its world-benear and Poet New York, would yield; some show such notable places as Portsmouth with its world-benear and Poet New York, would yield; some show such notable places as Portsmouth with its world-benear and Poet New York, would yield the place of the drawing-room to his canvance. A continued contemplation of nature to his canvance, and exercise of the drawing-room to his polished portraits. A continued contemplation of nature and exercise of his canvance. sistently maintained. This is the work of a New Englander thoroughly at home among familiar scenes and thoroughly aware of their pictorial possibilities, anecdotal among the Main Street façades of New Hampshire, lyric among the Catskills and along the Massachusetts seacoast. It is a fresh, clean world that Mr. Hassam depicts; exuberant and glad, he goes ahead with his painting year in and out, bringing his enthusiasms and talents into finer fusion with each turn of the wheel.

Portraits by Abram Poole Stylistic to a degree, smartly deco-

flair for the "precious" and super-re-fined, the art of Abram Poole is a tional numbers by Henry Creamer and Will H. Vodery; dances arranged by Henry Creamer and Frank Montgomery. Production staged by Sam H. conspicuously individual achievement. This young American painter is exhibiting at the Wildenstein Galleries a most attractive group of full-length portraits and all countries. length portraits and allegorical paintings. Whatever criticism may be leveled at the hardness, brittleness leveled at the hardness, brittleness even, of Mr. Poole's technique is distinctly offset by the crispness of form, sureness of design, and distinguished color sense displayed. Four large portraits cardinally dominate the exhibition. Mercedes de Acosta, the painter's wife, is sharply defined, black against gray; pointed hat and jaunty wrap, tapering fingers and buckled shoes affording many a chance for angular and acute emphasis, creating a willfully masculine and slightly sinister effect.

TALK OF PARTY SPLIT ON COURT FINDS MR. HARDING UNDAUNTED

President Confers With Mr. Hughes and Mr. Root Following Argument With Opposer—To Speak in New York

WASHINGTON, April 21—President Harding will maintain his stand on American participation in the World Court, it is learned on good authority have the services of Charles E. Hughes and probably applied to Court, the would be a split within the Cabinet

Court, it is learned on good authority here. His first statement on the subject will probably be in the address that he is to make in New York next Tuesday.

For more than a week Republican politicians opposed to the policy to which the Administration has committed itself have been engaged in an active campaign to break down this policy. This culminated yesterday in the visit of Will H. Wood (R.), Representative from Indiana, chairman of the Republican Congressional Committee, who told the President that if he persisted in supporting the prohe persisted in supporting the proposals for American membership in the International Court of Justice he would split the party, and jeopardize ize that the Administration shows no

its prospects for 1924.
Immediately after Mr. Wood left the sign of retieat, they will fall in line. The Administration is going before White House, Mr. Hughes and Elihu the people on its record. The com Root visited the White House and con- mitment in favor of American memt some length with Mr. bership in the World Court is a part It is well understood that of that record and it would merely if Mr. Harding listened to the advice of Mr. Wood, George H. Moses (R.), abandon it or to wobble on it.

OXFORD RUNNERS **REACH NEW YORK**

Capt. W. R. Milligan Reports Team in Fine Shape for the Relay Races

relay championship in 1920 in world's included L. R. Miller, E. P. Hewetson, versity of Chicago in an address. He C. B. E. Morgan, and G. R. Renwick. Stated they were the only group of W. E. Stevenson, former Princeton star, who also is a member of the Oxford team, has been in this country one of the great evils of athletics. for several weeks.

all were in excellent condition, having of Northwestern University, is in albenefited from light training daily on shipboard. They are entered in the two-mile and distance-medley team events while Morgan is slated to compete in the two-mile international race. "Colleges," said Director Evans, "Cannot successfully cope with the sit-many training to be in the two-mile international race. The runners were met by a commit-tee representing the University of process of elimination to take its Pennsylvania. They left immediately

for Philadelphia.

Oxford University, England, in the two-mile and distance medley races, ceive a college education. They have a reciprocation of Pennsylvania's deprived the country of several use-visit to Britain's shores last summer, visit to Britain's shores last summer, when, in a triangular relay contest between Oxford, Cambridge, and the American guests, Cambridge gained a fine victory, incidentally establishing British four-mile record.

There are few more pleasing aspects to sport than these frequent meetings, this rivalry, between Engtogether the two English-speaking rules, scholarship, and sportsmanship. countries. This year will afford grand opportunities for the rising sports men of both sides of the Atlantic to get to know each other better, since, following Oxford's visit to Philadelphia, Pa., for the relays on April 27 and 28, Yale and Harvard universities oppose the Light and Dark Blues at

embley Park, London. The Oxford runners for the Pennsylvania Carnival, if not exatly comparable with such redoubtable univer-sity sides as that of Cambridge in 1922, appears a useful combination.
The captain, W. R. Milligan, of New
College,—president of the Oxford University Athletic Club—needs no introduction to readers, for he was a member of the Oxford-Cambridge team which, in the Pennsylvania Re-lays of 1920, set up new world's records for the two-mile event. It is interesting to note that the remaining men in that side—W. G. Tatham and H. B. Stallard, both of Cambridge, and B. G. D. Rudd, the former Oxford president, have just recently been before the track-loving public again at the scene of so many intervarsity contests-Queen's Club. It was in a public school relay meeting, promoted by the Achilles Club, that they figured As last year, "past and present" boys of many of England's leading

public schools competed. Milligan, like Stallard, is a former Sherborne to him to foure unsuccessfully, in the star race of the day. He was obliged to concede a start of 30 yards in a mile to a young Charterhouse boy, V. E. Morgan—brother of the Dark Blue, "C. B. E." and the handicap proved too much. When the bell went for the last lap, Milligan appeared to have the race in hand, but his youthful adversary would not relinquish his lead and breasted the tape with 15 yards to spare. His time was the good one of 4m. 37 1-5s., and augurs well for his future on the track. At Franklin Field Milligan will run the mile in the distance medley and a "half" in the two-mile race. He is running very well just now, and is likely to extend fully the Americans by whom

he may be opposed.

The other Oxford men for the twomile relay are W. E. Stevenson, Balliol College; E. P. Hewetson, Pembroke, and L. R. Miller, Pembroke. The first-named is, of course, the former American quarter-mile champion who, when running for Princeton University, won a great 440 yards race from Rudd. That was in 1921, on the occasion of a Princeton-Cornell vs. Oxford-Cambridge meeting at Pel-ham Manor, New York. Since going into residence at Oxford, Stevenson has run some fine races, without rising to any great heights of ability; but, it may be remembered, met with a surprising defeat at the hands of the Cambridge president, H. M. Abrahams, in this year's intervarsity track meet. At the Pennsylvania relays, Stevenson will run the "half" in the

distance medley. The threequarter-mile and quarter-mile stages of this particular event will be run by Hewetson and G. R. Renwick, New College. The former, on his day, is a formidable miler; while Renwick, another second string for Oxford last March, is a determined runner over the shorter dis-tance. C. B. E. Morgan, Christ Church, a man seen to better advantage in cross-country running rather than track-racing, will accompany the team as spare man. Altogether, the team as spare man. Altogether, the side impresses one as being strong. In the absence of N. A. McInnes, New College, the Oxford cross-country captain and good two-miler, it can hardly be considered truly represen-tative of the university's athletic strength; but, even so, it can be relied upon to give its opponents some anx-

OKLAHOMA HAS A **GOOD TRACK TEAM**

Coach John Jacobs '16 Expects His Athletes to Lower and Threaten Records

NORMAN. Okla., April 13 (Special Correspondence)—University of Oklahoma track and field records are expected to be lowered in many events and at least two of the Missouri Valley Conference records will be seriously threatened by the Sooner squad this season, according to Coach John Jacobs, Oklahoma '16, who is rapidly rounding his team into shape.

Many new men have been drafted into the squad from the sophomore.

into the squad from the sophomore class. Among the foremost are Karl Frank '25, quarter-miler, who has covered the course in 50s. in daily work; Frank is also a broad jumper and member of the relay team; E. Brodsky'25, dashes; C. L. Andrews '25, low
hurdles; J. L. Schwab, '25, relay team
and quarter-mile; W. D. Hand '25,
discus, javen, shot and pple vault;
H. B. Knisely '25, low hurdles, javelin, pole vault; P. O. Hinds '25, high jump, and M. F. Ellison '25, discus.

Of these sophomores, Frank, Hand and Ellison are the men Jacobs is depending on to threaten the Valley marks this year, and, perhaps, shatter them in the future. A half second mark on the quarter mile will give Frank the record in Oklahoma and Ellison is now heaving the discus from 135 to 1351/2 feet in daily work, which is three feet over the Valley distance. Hand is reaching the 170-foot mark with the favelin easily, and is expected to go to 180. Veteran track men with the Sooners

are Capt. D. O. Vogle '24, low hurdles and javelin; W. W. Morse '24, 220-yard dash, 100-yard dash, relay and broad jump; H. P. Bonebrake '23, high hurdles; M. A. Robinson '24, dis-tances; F. W. Bronough '23, broad jump and pole vault; C. E. Davis '24, relay, quarter mile; V. E. Tims '24, high jump and pole vault; J. T. Man-gum '24, quarter mile and relay, and W. S. Booth '24, shotput. Of these meet, yet none of them are liable to break records.

Mangum is the surest man of the veterans in the quarter-mile event, although Captain Vogle gets over the

year, Thalheimer won the 1922 singles javelin about 170 feet.

Valuable men who may work this season but who have not heretofore placed on the squad are A. V. Jones It was not until late in August, '24, broad jump; Maurice Kelly '24, pole vault; George Hohl '24, low and high hurdles, and J. R. Bunn '23, javelin. Kelly is the pick of this group tional doubles title of the Southwestand is the pole-vault star of the Sooner squad this season.

The Sooner relay team, Frank, Mangum, Morse and Davis, is one of against time this spring have recorded the mile in 3m. 253-5s. This time should be beaten when the quartet gets on the cinder track. gets on the cinder track.

Coach Jacobs is in his second year with the Oklahoma track squad. He was an all-round track athlete and coached high schools until 1922, when he was called back to his alma mater. Assisting Jacobs is J. R. Tolbert. Harvard '22, in field events. Tolber holds the Cambridge-Oxford-Harvard-Yale shotput record, and is spending his time with the weight men of the

HOLLAND DEFEATS

Correspondence)—Many thousands of spectators witnessed the defeat of the French by the official Dutch team in an association football match at the Amsterdam Stadium last Monday. The score ended 8 to 1, showing the superiority of the Dutch team. The selection of the French team had been a controversial matter, as some of the selection committee wished to include provincial players, while others prewhich came to Holland consisted mainly of these men. There was, therefore, little combination or effort, each of them playing in his own style Two minutes after the beginning of the match, the Hollanders made their first goal, which gave them much confidence, a thing they greatly needed after the last Swiss

gained their first and only goal. PETERSON WINS TITLE ST. LOUIS, Mo., April 21 (Special)

The shortstop 18.2 balkline billiard crown, for years held unchallenged by Albert Cutler of New York, today rests upon the head of Charles Peterson of Inings:

Innings—

1 2 3 4 5 6 7 8 R H E

Wisconsin 3 1 1 1 1 0 0 1—8 6 2

Indiana 1 0 0 2 0 0 0 0—3 7 10

Batterles—Gause and Moomaw; Pickford and Aschenbrenner.

Inings Peterson captured the first block of the second match, played here, Peterson won, 400 to 197. Last night Cutler staged a brilliant rally, running 587 points while Peterson was counting the 400 necessary for him to win the title.

TOLEDO BOWLERS LEAD EVERY EVENT

Mrs. Greenwald Has Highest Average Among Women Contestants in U.S. Tourney

ST. LOUIS, Mo., April 21 (Special) The completion of the first week of competition in the women's national bowling tournament, which began in St. Louis last Saturday and which wilf St. Louis last Saturday and which will close Tuesday, finds bowlers from To-ledo holding the lead in every avent. The scores made by the bowlers yesterday did not affect the leaders, although changes of position occurred in the ranking of the first five in each

department of play.

The event which attracted the mo interest yesterday was the bowling of Mrs. Goldie Greenwald of Cleveland, who went into third place in the allevents competition with a total of 1556. Her scores for the nine games were 534 for team play, 492 for doubles, and 530 for singles. Mrs. Greenwald's average of 184 for the present season is the highest average among women

owlers.
The bowling of Mrs. R. Abraham of Milwaukee, who won the all-events title last year, was disappointing. The total for her nine games was 1410, as compared with her record-breaking of 1657 made last year. She failed to place in any event yesterday. Two changes of position occurred yesterday in the singles. Mrs. M. Blau of Milwaukee bowled into third place with her score of 541. Her games were 171, 194 and 176. Mrs. F. Wil-liams of Milwaukee bowled into fourth place with 536. Mrs. C. Johnston of Kansas City, with one point less, is in -University of Missouri will enter its econd baseball game against Kansas with 594 and Mrs. B. Texler of Cleveland, with 542, retain their places of

first and second, respectively. The only change in the ranking of the doubles teams brought about in yesterday's bowling was a tie for third place. The team of Mrs. E. Eastey and Mrs. G. Garwood of Cleveland by bowling 984, equalled the mark made earlier in the week by Mrs. M. Baker and Mrs. E. Chapman of Chicago. Other rankings in the doubles are Mrs. D. Swing and Mrs. B. Steadman, Toledo, first with 991; Miss D. Zapf and Miss A. Gray, Toledo, sec-Zapf and Miss A. Gray, Toledo, sec-ond with 989; Mrs. W. R. Smith and Mrs. O. C. Berhaus, St. Louis, fourth with 982, and Mrs. C. Johnston and Miss M. Felt, Kansas City, fifth with

In the all-events, Miss D. Zapf of Toledo still holds her lead with 1582. while Mrs. A. Jaeger, also of Toledo,

s second with 1566.
The Paige Dairy team of Toledo still holds first place among the five-woman teams with 2348. The Kerscher Elevator team, Toledo, is second with 2324: Peetz Brothers team of St Louis, third with 2318; Brooks Oils team of Cleveland, fourth with 2290, and the Gold Bonds team of Cleveland, fifth with 2266.

HUNTER WINS MEN'S SINGLES WHITE SULPHUR SPRINGS, W. Va., April 21—Tennis honors went to F. T. Hunter of New Rochelle, who won over S. H. Voshell of Brooklyn in the final round of men's singles of the Greenbrier Tennis Club's annual invisions. tation tournament, here yesterday. The victor in the women's singles was Miss Helen Gilleaudeau, who defeated Mrs. DeForest Candee, both of New York, in the final

WILLIAMS TRACK **OUTLOOK BRIGHT**

Intensive Work and Training Table of About 30 Men Will Start To

aces in the New England intercollegiates. Dodge is at present cham-pion in the 220-yard event, while while Miller, by the graduation of Carter of Brown. who beat him by inches last year, looks like a coming champion in century. In the quarter-mile Captain Stowers and Perkins can be counted upon to continue their victories of last spring, Stowers in particular being able to furnish empetition to any quarter-miler in New England.

Richmond, who won a close third in the New England's last year, and Keep, who finished second to Richmond in both the Amherst and the Vesleyan meets last spring, are looked to as probable winners in the halfmile. In the same race, Brayton, shifted from the mile, Onthank and Wilson are sure to push the winners in any race. In the mile, Coach Seeley can depend on Driscoll, ineligible last spring, to finish among the first, while Fasce, in the two-mile, should continue his long string of victories, this being his third year on the team. For the long races, the coach has a wealth of material in D. C. O'Brien. Fitchen, Holt and Cleveland.

There is an abundance of fine material in the hurdles this spring. C. M. a letter man two years ago, and Coleman being the most promisin the low hurdles. In the field events, hammer throw, Chapin, Dickey and Davis in the polevault, and Olmsted in the broad jump, being the only men out this year who have scored osistently in the past. Wishard is work in the javelin, discus, shotput, and high jump, and with practice he ble.

WILLIAMSTOWN, Mass., April 21—With about 75 men reporting every day to Coach Seeley, prospects for a strong track team look very bright at Williams College this year. Unfavorable weather conditions handicapped the work of the squad during the first part of the year, although workouts were held in the baseball cage several times a week.

The Purple team will be particularly strong in the track events this spring, from present indications. Miller, Dodge, and Olmsted are showing ability in the dash events, and the first two are likely candidates for places in the New England intercol-

The other Cubs to contribute to this modern four-base batting mark were G. E. Heathcote and Arnold Statz, while for Pittsburgh there was garnered one each by Harold Traynor and Charles each by Harold Traynor and Charles Grimm. In only one other game on the National circuit was a home run registered, that by F. C. Williams providing the Phillies' winning margin against Brooklyn, but in the American League there were four. C. M. Durst, supplanting G. H. Sisler at first base for the St. Louis Browns, made his first hit of the year carry him around the bases. Richard Reichle of Boston celebrated his entrance into a major league brated his entrance into a major league box score by doing likewise. In the Philadelphia-Washington game Leon Goslin and Frank Welch each went around the base paths alone.

the last Braves-Giants game John Bentley, making his debut in the box for New York, had only one left-handed batsman to face, Capt. W. H. Southworth, who drove out a three-base hit and three singles in his five trips to the plate. The high-priced recruit from Baltimore found his initial voyage

rough one. Cleveland fans have banded together in a "Stick to the Finish Club." Last evening the much-traveled Commis-sioner K. M. Landis graced the club's festal board and told the members he restal board and told the members he hoped they would really "stick to the finish," and show as much loyalty around the 1st of October as now. At that, the Indians may then be in a position to command respect, not in their own city alone, but throughout the J. J. McGraw, before leaving Boston, baseball world, as was the case expressed the opinion that the Braves' 1920. You never can tell.

The first game was won by Nebraska vesfirst game was won by Nebraska yesterday, by the score of 15 to 12. The game terminated at the close of the eighth inning on account of rain and darkness.

A pear tree in the corner, a plum on each side, or a row of peaches or quinces down the center, helps to make the complete garden. If there can be grapes, berdarkness. A high wind made accurate fielding difficult, and as a result 20 errors were committed. Several long flies, the land all seeses would have been dead of the land all seeses. themselves next to the perennial side, and the shorter season crops are most time closest together.

Almost all garden crops are grown best when grown quickly; a mellow soil, well fertilized to start with, will yield large dividends of satisfaction as the season advances.

Small fruits and perennial vegetables give permanence to a garden, and once started are the most satisfactory of crops. An old gardener has suggested for the family garden seven grape vines of five varieties ripening at different seasons; 30 raspberry plants of one standard variety strawberry plants; as many Batteries—Llewellen and Petty; Brem-plants of asparagus, and half a dozen rhubarb plants. All of these perennials may be set out as early in the spring as the soil can be tilled.

* * * The Ruralist suspects that a reason that more family gardens do not con-tain strawberry beds is a mistaken notion many people have that a straw-Bed, scoring four runs and defeating Springfield Training School, 8 to 5, here resterday. A series of errors and two Mts enabled Dartmouth to win the game. Springfield bunched lifts in the eighth and had apparently won the game, but Pitcher Mountain's support failed him and five errors were made in the ninth. Pitcher Edwin Dunlevy 55 of Dartmouth was hit hard, but his support was good. Mountain allowed the Green batters eight hits, but his beam was unsteady behind him, making 5 total of seven errors.

California Defeats Stanford at Golf

Annual Match Is Won by the One-Sided Score of 20 to 6

PALO ALTO, Cal., April 20 (Spe cial)—The annual golf matches held between University of California golfers and those from Leland Stanford Junior University at the Burlingame Country Club, near here, yesterday resulted in a decided victory for Cali-fornia, 20 to 6. The match with six nen on a team, was divided in halves. Singles were played in the morning. with three points on each match and four-ball matches in the afternoon scoring four points to the match. Lauren Upson, playing the course for the first time, turned in 77 for his morning round, making the second nine holes in par. Ditzler of Stanford, handed in a card of 78, which is a good game, as the course is 621 yards

Both teams held elections after the match, with the result that Stanton Haight was elected captain of the California team and Lauren Upson, business manager. S. V. Keuren '25 became captain of the Stanford squad, and Reginald Hirschman '25, business manager. Had the Stanford team been victorious, the players would gone to Portland, Ore., next month, to compete in the Pacific Northwestern Intercollegiate championship. fortunately the University of California does not goive golf any official recognition. The summary: SINGLES

SPRING FOOTBALL **ENDS AT COLUMBIA**

New Coach Will Start Fall Practice About Sept. 10

NEW YORK, April 21—Football practice at Columbia University came to an end yesterday and will remain dormant until the first fall workout, which will be held on Baker Field about Sept. 10. Coach P. D. Haughton will not return to Columbia until late in August, when he will begin pre-paring for the 1923 campaign.

After the long workout on Baker Field yesterday the men assembled in the Journalism Building and listened to a talk given by the head coach. Slow motion pictures of last fall's Yale-Harvard game played in the Yale Bowl were flashed on the screen, and Coach Haughton explained

The spring training season this year covered a period of three weeks, during which time Coach Haughton explained his famous system to Columbia. In the final week he advanced as far as scrimmages, emphasizing the defensive side of the game. Greatest stress, however, was laid on the fundamentals of passing, tackling, falling on the ball, running, dodging, blocking and taking out opponents. The coaching has been almost wholly devoted to personal instruction, with lectures at night and classes for the quarterbacks, centers, ends, linemen and halfbacks, each class being held under the direction of an assistant coach.

BUCKNELL WINS FIRST GAME STATE COLLEGE, Pa., April 21— Pennsylvania State College and Bucknell University play the second of a two-game series here today. Bucknell triumphed over Penn State yesterday, 4 to 2. Penn State scored a run in each of the first two innings, but was each of the first two innings, but was unable to hold Bucknell, which took the lead in the fourth inning. Allen Tarr, pitcher for Bucknell, held State's batters well in hand after the first two innings. Pitcher Black of State became unsteady in the fourth, which, coupled with two errors and a pair of singles, allowed Bucknell's three runs. Again in the sixth he was unsteady and another run came in. L. C. Long-hurst '24 relieved him with the bases full and retired the final batter. The

A CCORDING to figures obtained from 3333 dealers in 18 states, the National Automobile Dealers Association estimates that on March 15, there were 400,000 used cars on the floors of the retailers, representing a total capital investment of \$152,206,340, and computes the losses that the dealers will absorb on this stock and investment during the first three months of the present year as \$23,951, 982. The compilation shows an average used-car allowance as \$360.67, which is higher than the ultimate selling price to the consumer. The lowest average allowance, \$259.16, was in Iowa, while the highest valuation to owner was \$522,40, the Louisiana average. The largest average dealer loss was \$2004.74 in Louisiana, the lowest being \$241.40 in Minnesota.

The Ruggles Motor Truck Company

The Ruggles Motor Truck Company The Ruggles Motor Truck Company has begun production on a new road builder model especially adapted to the requirements of contractors. The wheelbase is 115 inches and the maximum total weight, including chassis, body and load, is 13,000 pounds. The truck has a four-cylinder, 4x5 engine, and a double reduction rear axle. The Gardner Motor Company has announced an advance in the prices of all models ranging from \$30 on the standard open models to \$80 on the sedan. An increase in price of \$30 on

standard open models to \$80 on the sedan. An increase in price of \$30 on the standard five-passenger phaeton is in effect by the Gray Motor Corporation. The phaeton now lists at \$520 compared with the former price of \$490. The remainder of the line remains unchanged in price. The Moline Plow Company have made an advance of \$75 in the price of the Moline tractor, model 9-8 being now \$725 compared with the former price of \$650. ormer price of \$650. Continuance of a large volume of

closed car business is having its effect in keeping prices at or very near the present level, something which would be impossible were all the trade in open bodies. In almost every case of increase the closed bodies are advanced only moderately, while the open care only moderately, while the open cars show the largest additions. Some of show the largest additions. Some of the companies report that they are the companies report that they are making open cars almost at a loss, but by pushing the sales of closed bodies they are able to equalize expenses so as to show a safe profit-margin on the entire line. It is expected that the rural and farm buying will be on open models, which will cause a general advance in prices to cover contingencies. The cost of storage and driveaways has been very heavy owing to the condition of the roads after the winter, and the high cost of storage there is not a factory in the industry whose output is not better than 30 per cent closed cars, and in some cases this runs to 50 per cent and over. One of the cars built for use at the Indianapolis Speedway, on May 30, is reported to have attained a speed of 112 miles an hour on the Beverey Hills Speedway in California. The construction of this car is interesting. To minimize wind resistance a streamline form of body is employed, with a frame so narrow as to cut through air curso narrow as to cut through air currents constantly forming on the track at high speed. The car is said to have 720 square inches projected area, as compared with 874 square inches on the cars with 183 cubic-inch engines used last year. The weight of the complete car is given as 1353 pounds. The car is fitted with eight-cylinder engines said to weigh 303 pounds. engines said to weigh 303 pounds. The weight of the springs is given as 12 pounds each, and that of the rear end assembly, without gears, as 69 pounds. The wheelbase is understood to be 100 inches and the tread as 52 Hartland Co., Inc., 1974 B'wy, N. Y. City

motor bicycles, parts and accessories motor bicycles, parts and accessories entering its territory since April 1. A preferential reduction of one-third of the duty has been extended to Great Britain and the British Colonies, which means that motor cars and motor bicycles going from Great Britain to Ireland will be subject to an import duty of 22.2 per cent ad valorem.

From statistics furnished by the

From statistics furnished by the Ministry of Transport in Great Britain, for the year ending Nov. 30, 1922, it would appear that in England the total number of licenses issued during the 12 months was 1,172,376, of which number annual and short-period licenses represent 674,249 and quarterly licenses 498,127. Included in these figures are private-car licenses to the number of 370,617. In Wales the total number of licenses issued was 74,046, of which 19,005 related to private cars. In Scotland the total license issue was 120,776-of which 70,729 were annual or short period, and 50,047 quarterly. It must be understood that in America a motor car is registered for the whole year, thus giving one number plate for each car on the road, but in Great Britain there are annual, short-period and quarterly licenses issued in four or five classes, so that according to figures one canont arrive at exactly how many vehicles are on the road. One car may venicles are on the road. One car may be operating for three months, another for six months, while the third is in constant use. This system is very confusing, and it is estimated that in order to license 907,972 vehicles, no less than 1,367,198 separate licensing operations were required.

The American Petroleum Institute estimates that the dally average gross erude oil production in the United States for the week ended April 14 was 1,951,850 barrels, as compared with 1,942,150 barrels for the preceding week, an increase of \$500.

NEW YORK STOCKS Closing Prices

An advance of 1½ points by Winchester Arms 7½s was the only important price change among the industrials.

MARCH EARNINGS

OF STREET RAILWAY

CONCERN EXCELLENT

In ordering a dividend of \$2.50 a share on the Eastern Massachusetts Street Railway adjustment stock at this time, trustees were influenced by the fact that the road has a present surplus of about \$498,000, and that after payment of the adjustment dividend and also deducting the Aug.1 next dividends on both the first preferred and preferred "B" stocks, the surplus after charges of \$107.73! compared with \$23,317 in the corresponding month of 1922, brought the quarter's net for dividends up to \$291, 2825. This is equal to an annual rate of \$1,167,300, and after allowing the full stated rate of dividends on all three senior stocks means \$3.56 a share on the \$84,881 shares of common.

WEEKLY REVIEW OF CHIEF EVENTS IN WALL STREET

Stocks Alternately Weak and Strong-Close Week With Losses Outlook Bright

NEW YORK, N. Y., April 21 (Special)—The stock market during the week did not for any length of time reflect the most important announcements and developments. Individual issues and groups of issues advanced or declined temporarily, apparently because of highly speculative operations, and because of conditions affecting directly only those issues or ing directly only those issues or

Judge E. H. Gary at the annual Judge E. H. Gary at the annual stockholders' meeting of the United States Steel Corporation, outlined the strong cash and general asset position of that company. He called attention, among other things to the fact that, since its organization, at least \$1,000,000,000 had been put back into the property. When the company was organized in 1901, one of its original officials, who had occupied a prominent position with one of the largest subsidiaries, said that probably the bonds authorized and issued represented at that time practically all the value of the entire undertak-ing. He added that apparently the \$1,000,000,000 of preferred and com-mon stock together must be considered very largely, if not altogether

occurred in the last 22 years in the intrinsic value of the properties and the securities issued against them. Nevertheless, Steel common responded only for a brief time and to the extent of only about a point, to all the favorable statements made by Judge Gary to the stockholders. It may be conwere not of an encouraging character. There was unimportant buying of the stock for a day or two in an effort to interpret one of his remarks as foreshadowing an extra dividend to the common stockholders before very

Buying of Rails For a day at a time, railroad stocks pretty generally showed considerable improvement. Canadian Pacific and Union Pacific were the most conspicu-ous in the brief upturn. It was ruformer stock was being bought on a rather extensive scale for London ac-Inquiry in official circles disclosed the fact that only small amounts were being presented at the New York transfer office to be split up into 10 share lots for shipment to London. The buying of Union Pacific was based largely on the optimistic state-ments of Judge Lovett and the an-nouncement that the company would expend \$40,000,000 this year for equip-ment and improvements. It is to be gravely doubted that the buying of either stock was of an important char-

Harding may say with respect to the railroads in the series of addresses that it is reported he will make on his way to Alaska and return during the way to Alaska and return during the coming summer. Private advices from Washington regarding this point are distinctly conflicting. The latest are to the effect that he will take a strong position in favor of railroad consolidation and the pooling of equipment, but will keep pretty well away from the proposal of the farm bloc for a substantial reduction in rates on agricultural commodities. The week closes with sentiment as much confused as ever relative to the immediate future of the market for railroad

Costs Are Increasing

While there is every indication of a large volume of business and correspondingly large gross earnings, an-nouncements are being made nearly every day that point toward reduced net earnings in proportion to the gross. Prices for materials are increasing and apparently a pretty active bidding for common labor between the railroads and the industrial corporations is about to begin. Already the latter are increasing the wages of that class of labor. It would not be surprising if before the year is out the railroads will have to agree to higher

wage scales for several classes of unionized labor as well.

With a period of prosperity well under way, the labor question always has been one of the most active and troublesome with which employers have had to contend. From present indications the remainder of this year will not prove an exception, although it is hoped that serious strikes will be averted. On the other hand, the fact that a strike of anthracite miners was announced only yesterday suggested the possibility of fairly general trouble again this sum-

mer with that class of workers.
Undoubtedly the prospective labor situation and the practical certainty of at least as high prices for materials and commodities generally as those now prevailing are a big factor in the tendency toward conservatism in vari-ous lines of business activity that has

en noted recently. Outlook Still Encouraging

Secretary of the Treasury Mellon was quoted as expressing the belief confidently that prosperity not only is here, but that the outlook for business seldom has been more encouraging. Every well-informed observer is willing to subscribe to this prediction in a general way, but the most conservative are qualifying their opinions with suggestions are to the precibility. servative are qualifying their opinions with suggestions as to the possibility of labor troubles and the effects upon business of still higher prices. Those who give special attention to conditions in the agricultural regions point out the seriousness and significance of the official statement that in 1922, 2,000,000 persons left farming life and that only \$80,000 went from the town to the country.

from the town to the country.

In conservative circles the action of the Government with respect to speculation in sugar was favorably re-ceived. It had a depressing effect upon the market for sugar stocks, and to some extent on the industrial list as a whole. The best opinion is that the felt much longer.

GRAIN MARKET SEEMS DUE FOR MORE ADVANCES

Rush of Seaboard Buying Appears, Indicating Foreign Demand—Course of Prices

CHICAGO, April 21 (Special)—Recessions from the high prices for the present crop achieved last week-end, were recorded by all grains on the Chicago Board of Trade during the period closing today. The reaction was slight, however, and the market finds itself in a favorable position for further advances. Continued unfavorable crop weather made higher prices

Strong Foreign Demand the bull movement has been resumed. A rush of buying from seaboard sources indicated a strong foreign de-mand. European markets have followed the advancing prices in the United States closely. It is pointed out that last year foreigners bought American grains, especially wheat, early and refused to buy later. This, increase the cost from 7½ cents to 15 year they refused early but are now cents a yard and beyond this, as a of unfavorable news on the new crop, advanced 111/2 per cent to 41 per cent wheat when it was learned from an figured in this season's goods, and it

the acreage to spring wheat was grades of wool have not as yet reached larger than independent reports had their peak prices. indicated. Liquidation was caused by rainfall coupled with this report, over for the spring-1924 season naturally the western portion of the wheat belt. must be materially higher than those Corn prices reflected the hesitancy quoted at the opening of this season."

in wheat, but news on the whole was bullish. The farm demand in the south and southwest is very heavy. News of the small Argentine crop means that Europe must turn to American sources, and this explains the orders coming from the United Kingdom at

Oats showed increasing activity with a brisk investment demand. There was considerable liquidation but shorts bought liberally and the prices held well. Cash buyers have been taking May oats in good volume. Trade in rye futures broadened. While there was some liquidation in sympathy with wheat, selling was scattered and

not aggressive. Course of Prices

May wheat at \$1.26½ was down ½ cent from the season's high made last Saturday; July at \$1.24 gained 1/4 cent; September at \$1.22 % was down

cent; July at 46% cents was down 1/2; September at 45% cents was off Rye for May at 86% cents was down 1% cents, and July at 88% cents was

off 16 cent. CHICAGO, April 21-Rain benefiting the winter crop led to price downturns in the wheat market today. The opening, which varied from unchanged figures to % cents lower, with May 1.24 to 1.24% and July 1.21% to 1.22%,

action.

Values started 1/2 to 1/4 c lower, May 781/2 to 781/2, and later showed further declines.

F. L. Milliken & Co., Boston: Steels, equipments, sugars, and perhaps coppers should advance further before the market is definitely over.

CONSUMPTION OF OIL BY BRITISH VESSELS HEAVY LONDON, April 21-The steady in-

crease in the consumption of fuel oil by steamers in foreign trade is reflected by figures published in the British Board of Trade Journal.

Consumption in 1922 amounted to 23,300,000 gallons in the first quarter, These figures account for about 36.2

per cent of the gross imports of fuel oil in 1922, and about 65.4 per cent of the imports for the first quarter of this controversy in Continental oil

circles has risen over the action of the Royal Dutch Shell group in purchasing 70,000 tons of oil from the Soviet Government, with an option of 130,000 tons at 65s a ton, f. o. b. Russian owners of the

Batoum fields have lodged strenuous protest with the international consortium, but the Royal Dutch Shell group replied that the agreement apolies only to concessions not to supplies. Indignation is expressed by former owners on the ground that as long as the Soviet is able to make ey from the Batoum fields it will decline to give them up.

MARKET OPINIONS

J. S. Bache & Co., New York: Attention has been called to the more or less unliquid condition of the street, due to large recent offerings of bonds and shares of new promotions which have not been well distributed. There is, no doubt, a good deal of merit in the suggestion. This, however, does not alter the fact that many excellent securities are yielding a high return and are still cheap on their merits.

Richardson, Hill & Co.: We favor the Richardson, Hill & Co.: We favor the purchase of the following stocks around present levels: Atchison, Chesapeake & Chio; Norfolk & Western, Pere Marquette, Missouri Pacific preferred, Southern Railway, Pittsburgh & West Virginia, Kennecott, Gränby, American Smelters, U. S. Smelting, American Locomotive, American Steel Foundries, White Motors, Mack Truck, Timken Roller Bearing, Warren Brothers, Brown Shoe.

Corn for May at 80 cents was off 1% cents; July at 82% cents lost % we believe that the whole speculative cent; September at 82% cents was down % cent.

Oats for May at 46 cents lost % watched for definite signs of the next sent table of the second sent table of t big movement in either direction. Cer tainly the utter failure to respond to news and bullish factors is disconcerting, to say the least.

> Elmer H. Bright & Co., Boston: The market for many of the stocks, which are usually active, has been noticeably, thin, rising and falling considerable fractions, on the execution of orders of a few hundred shares. This may be taken as an indication that the market is largely professional, and reflects chiefly the attitude of the trading element from moment to moment.

In oats, the initial prices were unchanged to %c down, May 45 to 45%. Bartholomew & Co., Boston: Railroad securities are intrinsically sound investments, with a book value far in excess of market prices, and we far in excess of market prices, and we Tucker, Bartholomew & Co., Boston: ket in the near future will give recognition to the much more favorable outlook for them. The dividends now being paid have been maintained, with only a few exceptions, during the last four or five years or dividends the favorable working on contracts have been fillfour or five years or during the leanest period in modern railroad history. A continuation of current earnings will undoubtedly bring about increased divi-dends and will place many of the present non-dividend payers in the dividend

Havden, Stone & Co., Boston: The stock market is now "between scasons."
Stocks have had a big advance and can no longer be called cheap. The 23,300,000 gallons in the first quarter. Stocks have 26,800,000 in the second, 49,400,000 in can no longer be called cheap. The same third and 41,800,000 in the last same thing might have been said at the quarter. The figure rose to 47,100,000 close of 1915, but after several months of hesitation and some recession, there in the closing months of 1916, was, in the closing months of 1916, another very large market. We are no longer at war, and we trust will see no corresponding inflation, but there is a sufficient stimulus in the excellent business that is now being done, and with the profits that are being realized, to warrant measurably higher prices in a number of issues before this period comes to an end.

> Tucker, Anthony & Co., New York: The familiar arguments in support of a long position still exist, and although in the case of a good many stocks am-ple rise is admitted to have been efsuch as steels, coppers, and rails, which are likely to be the features of a new period of bullish activity somewhat

DIVIDENDS .

Hood Rubber Company has declared a regular quarterly dividend of 1½ per cent on the preferred stock, payable May 1 to stock of record April 20.

Francis Henshaw Dewey Sr.

BANKER, trustee, manager and executive of railway and industrial enterprises, the services of Francis Henshaw Dewey Sr. have been A largely given to important manufacturing and transportation corporations in the east. In the street railroad field he has been recognized as one of the foremost managers in New England. In 1893 Mr. Dewey was elected a director of the Worcester Consolidated Street Railway Company. Five years later he was made president, and he is now chairman of the

under his administration the system has been extended to a network of cities and towns, more than 30 in all. He has headed the New England Investment & Security Company, which owns various street railways. He took over the legal affairs of the Worcester Mechanics Savings Bank in 1880, and was elected a trustee after several years of service in this capacity. Later he was appointed solicitor and counsel for the Mechanics National Bank. Since that time he has been the principal figure in the management of these large banking institutions. Mr. Dewey has been president of the latter bank since 1888. He represents large interests in transportation, through the New York, New Haven & Hartford Railroad Company, the Boston & Maine system, and the New London Northern

Railroad Company. Mr. Dewey had held office as a director and member of the executive council of the New England Telegraph & Telephone Company, vice-president of the Morris Plan Banking Company, and an official of the Worcester Gas Light Company. He includes in his outside activities a place on the board of Clark College and Clark University, and is a director of the Associated Charities.

CLOTH TRADE IN FALL RIVER DULL

Unless Business Picks Up Mills Are Expected to Curtail

cial)-The local cloth market this week experienced the quietest week since before the war. Total sales are about 25,000 pieces, and unless an unusual sale is made today, previous records for light sales within the last 951 or an average of 255 hours for few years will have been broken

more than 40,000 pieces for the last 31 numbered 37,308,713, of which 35,working on contracts have been filling their storehouses with finished 276,302 in place Feb. 28 and 35,307,-

An unusual thing has been the shad-ing of prices in an effort to procure more business in the face of an ad- operated at some time during the vance in wages to all employees of 121/2 per cent, due April 30. Quotations have dropped an eighth of a cent on some constructions.

That buyers have shown no inclination to meet the existing prices is attributed to the big break in the raw cotton market during the last week. It is reported that some of the outstanding contracts run well through the present month, but when these

either have to be piled up in the store-

houses or there must be a curtailment

of production.

ABATEMENT OF NEW BUYING IS NOT UNEXPECTED

Dun's weekly review of trade says: It is not surprising that recent weeks have brought a slackening of the domestic business expansion and check to the rise of prices.

Abatement of new buying has be-come more sharply defined in certain ndustries, as in iron and steel and textiles, and some markets that had advanced appreciably have developed reactionary tendencies.

These are not considered disquieting phases, because progress had been unusually rapid during the first quarter of the year, and it was recognized by close observers that the movement could not continue indefinitely at a ecord-breaking pace.

ous maximums of pro With all previous maximums of pro-duction and distribution surpassed in different instances, a temporary pause, at least, was to be expected.

SKATE MAKERS TO MOVE SPRINGFIELD, Mass., April 21— Barney & Berry, manufacturers of skates, will close their plant here about June 1 and go out of business and move the machinery to New Haven, Conn., as part of the Winchester Repeating Arms Corporation, which a year ago bought the plant from Barney & Berry

first three months of this year as \$141,190, compared with a loss for the similar period last year of \$157,914. This shows interest on \$1,963,000 7 per cent

ROAD'S CONTROL SUBJECT OF SUIT

Pennsylvania Seeks Injunction Affecting Stock Purchase by New York Central

NEW YORK, April 21 - Business aggregating more than \$10,000,000 annually was said today to be involved in the suit filed by the Pennsylvania Railroad and other lines to nullify the Interstate Commerce Commission's order permitting the New York Central lines to purchase the stock of he Chicago River & Indiana Railroad. Knowledge of the suit, which was filed in the United States District Court of Northern Illinois, became public yesterday, when the New York Central filed an answer.

The Pennsylvania was said to have the backing of the Baltimore & Ohlo, Chicago, Indianapolis & Louisville, the Grand Trunk Western, the Pittsburgh Cincinnati, Chicago & St. Louis, and

Application is made for a temporary injunction pending a permanent order By virtue of its order, the Interstate Commerce Commission becomes a defendant in the action.

In the face of concerted opposition, the commission in May, 1921, decided that the New York Central could acquire the stock of the Chicago River & Indiana Railroad, and obtain control of the Chicago Junction Railroad under a 99-year lease.

The latter's tracks cover the Chicago stockyards and adjacent manufacturing territory, while the Chicago River & Indiana, a road three miles long, connects the stockyard tracks outside lines. Control of the two by the New York Central, rival roads held, gave the latter road a strategic position in the heart of the Chicago packing and manufacturing

MARYLAND HAS GROWING SHORTAGE IN LABOR LINES

BALTIMORE, Md., April 20 (Speial)-The Bethlehem Steel and Shipbuilding Corporation announced today that 3000 men will be added to the force here to help handle the increase in orders recently received by the two The Baltimore Copper concerns. Smelting & Refining Company also has asked for 1000 more operatives A number of other firms that have been going to capacity for the last help, running into the thousands. The demand for workers passed the supply a few weeks ago and now efforts are being made to bring more workers

FOR LAST MONTH one half the number of workers

ply a few weeks ago and now efforts are being made to bring more workers to the city.

A situation is developing somewhat like that prevailing during the war. The municipal employment bureau finds it is able to supply only about one half the number of workers needed.

NEW YORK AIR BRAKE'S AFFAIRS Cash holdings of the New York Air Brake Company on March 31 were approximately \$2,500,000, compared with \$1,827,097 Dec. 31, 1922. Sales in the first quarter are understood to have been \$2,600,000, compared with \$1,079,000 for the similar period a year ago. March sales reached \$964,000, compared with \$429,000 in March, 1922. Willys-Overland Company of \$15,000,000 of long-term bonds will provide means for refunding \$10,000,000 short-term notes maturing Dec. 1, 1923. At the end of 1922 notes outstanding exceeded \$16,000,000, but \$6,000,000 have since been retired through the sale of certain assets and from earnings.

ROADS' TRAFFIC GREATER CHICAGO, April 20-In the first 14 days of April, the St. Paul Railway 77 168 carloads. with 57,406 a year ago. The Burlington road moved 79,004 loaded cars during the same period, compared with 56,918

CUSTOMS RULINGS

NEW YORK, April 11 (Special)—Cotton quilts, imported from China, were the subject of an interesting test case just determined by the Board of United States General Appraisers in favor of importers in this and other cities. The protest was argued before the customs tribunal in the name of William A. Brown & Co. The quilts in question, consisting of a loosely woven gauze-like fabric, filled with cotton batting, were taxed on entry at the rate of 30 per cent ad valorem under Paragraph 266 of the tariff act of 1913. The importers contended for classification as quilts, with duty at the rate of only 25 per cent ad valorem, under Paragraph 264. This contention is upheld in an opinion by Judge Howell.

While this decision applies particularly to shipments under the 1913 law, the principle established will influence classifications under the present law. Realizing the importance of the issue, the Government fought to have the higher rate apply.

the Government higher rate apply.

FAVORABLE FACTORS CAUSE STRONG TONE IN LONDON MARKET

By Cable from Monitor Bureau LONDON, April 21-The budget proposals were cordially received in the periencing what is described as an "industrial boomlet." Last week's adsustained. The very satisfactory Babcock-Wilcox dividend, and the immediate success of the Dorman long debenture issue, gave a fillip to the iron,

coal and steel markets. Following are Friday's closing quofations of a selected list, together with net changes from a week ago:

*Rise or fall noted in shillings.

STEADINESS RULES FOR MOST PART IN LIVE-STOCK MARKET

CHICAGO, April 21-Cattle prices rere generally steady in yesterday's ive-stock market, though receipts were light. Heavier grades and canners ere rather slow, but beef cows and heifers were strong. Hogs were slightly easier and sheep uneven. Receipts, prices and conditions were

s follows:

DRY GOODS TRADE ACTIVE

CHICAGO, April 21 - Favorable veather this week has given the vholesale dry goods business an im petus, resulting in increased number of buyers in the market and freer buying for immediate shipment, says the John V. Farwell Company.

MAXWELL PROFITS DETROIT. April 21—At the annual meeting of the Maxwell Motor Corporation, net profits for the first quarter of 1923 were reported as \$1,026,000, compared with a loss of \$611,438 in the similar period of 1922.

POSSIBLE EXTRA STEEL DIVIDEND

Strong Cash Position and Good Earnings Seem to Warrant Such Action

NEW YORK, April 20-Shareholders of the United States Steel Corporation are inclined to place a favorable construction on the statement of Judge Gary that the "corporation had added at least \$1,000,000,000 to its property values since it began busi-

While the judge made no promises, it is generally known that improvement in earnings since Jan. 1, together with the unusually strong cash position of the company, would warrant the payment of one or more ex-tra dividends on the common in 1923. United States Steel is paying practically the same dividends as it did at the time of organization, whereas, the average wage per employee in-creased from \$717 annually in 1902 to

\$1500 annually in 1922. Wage earners have evidently re-ceived most of the benefits derived city, and the Stock Exchange is ex- from the expenditure of nearly \$1,100,-000,000 for new construction and an "industrial boomlet." Last week's ad-vance in gilt-edge stocks was well capital. Judge Gary says the corpo-000 to its property value since organ-

The regular dividend of 5 per cent on the common is equal to just 21/2 per cent on this added investment dends amount to only \$50,634,802 annually, equal to little more than 2 per cent on total valuation of \$2,500,-

At the close of 1922 cash and investments in current and sinking fund assets aggregated \$318,633,205, compared with \$306,876,466 at the close of

Cash holdings at the close of 1902 were less than \$58,000,000. In no year up to 1915 did cash holdings exceed \$111,000,000

United States Steel in the first quarter may earn \$38,000,000. This will mean a sruplus after preferred and common dividends for the first half of 1923 that may run close to \$4 a share on the common. Earnings in the last half of the year are expected to be considerably in excess of the first half and Steel could pay fair extra dividends in 1923, and at the same time add substantial sum to

surplus The \$1,000,000,0000 which Judge Gary says has been added to the value of United States Steel is equal to almost \$200 a share on the com-

SUGAR FUTURES ADVANCE AGAIN

NEW YORK, April 21-Sugar futures advanced 9 to 20 points at the opening of the market today.

An estimated reduction in the Cuban crop from 4,100,000 tons to 3,735,000 tons by H. A. Himely, one of the leading authorities on sugar, and the continued strength in the spot market were influencing factors.

BANK OF FRANCE FIGURES PARIS, April 21—The principal items n this week's statement of the Bank

of France (in francs) compare:

LACKAWANNA'S SURPLUS The Delaware, Lackawanna & West-m's balance sheet as of Dec. 31 shows total assets of \$248,467,737 and a profit and loss surplus of \$117,304,031, com-pared with \$254,301,454 and \$116,961,035,

respectively, in 1921. COTTON MILLS TO CLOSE

General Federation of Women's Clubs Atlanta, Georgia

THE CHRISTIAN SCIENCE MONITOR will, as usual, report this meeting through a special correspondent. Two million club women will be represented at the Atlanta Council, and all these women will be interested in the proceedings.

Many topics of importance will be considered. In addition to the election of a president and other officials, the questions of county organizations, club institutes, and junior memberships have a prominent place.

Illustrated advance stories will appear in the Monitor April 26 and May 3. From May 7 to 11 each day's proceedings will be thoroughly reported.

The Aim of Education

A letter received from an attendant at the National Conference on Educa-tion in Toronto is of such interest that it would seem to me it should reach all readers of the Monitor. It reads:

all readers of the Monitor. It reads:
Although the Monitor is probably giving some of the addresses of our National Conference on Education, which met here last week, I feel that it may be of interest to you to hear of this convention from one close athand. I decided that it would be well worth while to drop my regular duties for a week and take in this conference. I have heard 13 lectures and feel glad to know the thought of education that these people have who as yet do not look at things from our standpoint. I wanted also to find out if we were growing nearer together if we were growing nearer together in our ideals and methods of working —to hear such a man as Sir Henry Newbolt, author and poet, say that the end of physical science was in sight, that we were on the verge of a new science, a spiritual science whose data was not ghosts and spirits whose data was not ghosts and spirits and communications with the after world, but rather we would find through this science a new man, that man was not what we had thought he was; through this new science we were going to see behind the veil. He spoke as though this was something he did not understand, but rather something he intuitively felt was the wall was were on the thing he did not understand, but rather something he intuitively felt was true. He said we were on the verge of the discovery of an old truth. His whole lecture was wonderful, full of great spiritual beauty and given with such gentle force and eloquence, like a great seer or prophet, he seemed, calling the people to make ready for this awakening. to make ready for this awakening. My heart fairly throbbed with joy when I realized that the day was at hand and the truth he dimly saw and felt was already a living experience

Sir Henry Newbolt also gave a very

To the Editor of The Christian Science

fine address on the Bible. He said in this book we would find the secret of health and strength, that it was the one and only book in the world which had lost nething through translation, that there was some unaccountable affinity between the English-speaking race and the Bible, never a crisis for 900 years in the affairs of England that the Bible had not had its influence.

I am mailing you a program of the conference that you may see the character of the lectures. What impressed me most was the deep spiritual convictions of the speakers. Even in such a lecture as "Manners as a Social Language," Mr. Ratcliffe (of The Manchester Guardian) began his lecture with illustrations from the Bible of the seemly behavior, the dignity and courtesy of its characters. Sir Michael Sadler, who is considered the greatest educationalist in the world, spoke of character and service as the one and only aim of education, and that no life of study was well balanced that did not come in direct contact with some helpful work with one's fellow men; and that old soldier, Sir Robert Baden-Powell, it was a joy to listen to him, as simple and straightforward as a boy, pleading that the energies and discipline that were used in the war should now be used in the interests of peace.

Education and all life work should

of peace.

Education and all life work should have for its aim, How can I serve better? not, How can I get more? To have this great soldier urging us on to self-sacrifice and kindness and good fellowship did seem like the good fellowship did seem like the coming of better things. And then Lord Robert Cecil you have heard from at least through the Monitor. One is impressed above all else by his sincerity. Surely he is making the work of the League of Nations plainer to us all, and his plea that public contains must support this public opinion must support this League gives us all our part to play in world affairs.

be without its parallel in England, though not, perhaps, in America. M. Fribourg Demands France A movement is on foot to establish a chapter of the Eastern Star in Perth. This order seems to be mak-Control Tangier, in Conjunction With Sultan of Morocco

ing great headway in Scotland, but it is not permitted to establish itself in England: or, rather, English Free-masons are inhibited from giving it TANGIER, March 28 (Special Correspondence)—Surprise and uneasines have been caused among the Spanish colony at Tangier by the frank statements made upon the qubject of the French pretensions to Tangier by M. Fribourg, a Deputy of the French Chamber. What made the surprise all the greater was the fact support or belonging to it, as they may do in the United States and This is a weak of centenaries. The Old Dundee Lodge, No. 18, is celebratsurprise all the greater was the fact that M. Fribourg had just previously sunparior; 5 acres; view Metropolitan Basin and Lodge, a public school lodge, which has just been consecrated at Malvern, Victoria, while Dr. Donald Baker, Bishop of Benalgo, holds the same office in the newly consecrated Combeen in Madrid in connection with advancement of the Casa de Velas-quez, a French institution there, one is limited by its by-laws to a member-ship of 35. The other three lodges of the chief objects of which is the improvement of Franco-Spanish rela-tions. It is difficult to understand how Dr. Baker has spent nearly the whole of his ministerial life on the Australian continent. Dr. Harrington Lees 10, and the Globe Lodge, No. 23. Many he could go immediately to Tangier and use phrases that are highly disawas only recently appointed to the Australian episcopacy.

Australian episcopacy.

Australian episcopacy. greeable to Spain.

French Interest Preponderant M. Fribourg's speech throughout was a proclamation of the right of France to dispose of Tangier in the way that seemed best, and he hoped that soon all nations interested in this important question would agree to give Tangler a special régime, with-out losing sight of the sovereignty of Wapping, facing the river, near Wapping New Stairs, made familiar to all Dickensians in "Our Mutual Friend."

It was demolished some years ago the Sultan. As Fngland had posse of Gibraltar, he said, and Spain with Ceuta held another key of the Straits it was right that France should be and the site now forms part of wharf the Mediterranean power that should have the care of Tangier. He declared that it would be outrageous to permit that the Sultan, conqueror with France in the war against Germany, should now be eliminated from Tanments used in architecture. The expert workman uses those tools to
adorn the land with stately and superb edifices; so Freemasons should
use the moral significance of those

The Augustynha is also included. gier for the benefit of Germany, since that and nothing else would be signified by establishing there an absolutely international régime such as had been spoken of.

The "Deputy for Tangler" The French Minister warmly congratulated Mr. Fribourg on his speech and the meeting decided to regard Mr. Fribourg as "the deputy for Tangier," intrusting him with the duty of supporting in Parliament and in the press the French claim respecting it.

Among the other European and the American elements in Tangler there has been much keen comment upon the circumstance that the French authorities should have been present where such a speech was made, and, above all, that the Minister himself should have congratulated Mr. Fribourg and declared that he shared his optimism. On the day after his speech, Mr. Fribourg left Tangier for France, passing through Spain on his way.

REFORESTATION WAYS TRIED SAN FRANCISCO, Cal., April 10 Special Correspondence) — Reforesta-tion in the city park of Arcata, Hum-oldt County, California, takes on inboldt County, California, takes on international aspects in the contest of French and German foresters who are matching their widely divergent ideas concerning the method of thinning stands of second growth timber. The park is part of an area which was cut over nearly 50 years ago and is now occupied by a young stand of redwood, Sitka spruce, fir and hemlock. Prof. Woodbridge Metcalf of the department of forestry in the University of California, is directing the experiments which of the European craft, the grand tenets of their order are of high moral standing. In China it is claimed that more than 80 per cent of the population of mature age are now connected with the order.

KHADI EXHIBITION HONORS GANDHI

Sir P. C. Ray Speaks on Question of Swaraj

BOMBAY, March 16 (Special Correspondence)-The Gandhi week commemorative of Gandhi's imprisonment was inaugurated in Bombay on March 12, with the opening of the All-India Khadi Exhibition. The parting mes-sage of Mahatma Gandhi to his countrymen on the eve of his entry into jail was embodied in the gingle word, "Khadi," and there is now no greater enthusiast of the Charkha (spinning wheel) than the natural scientist. Sir wheel) than the natural scientist, Sir Prafulla Chamdra Ray, who opened the exhibition, who in the course of his speech narrated how he became a convert to the use of Khadi, which

once he used to scoff at it.

After deep thought he came to the conclusion that economic solution of the question of Swaraj (self-governwas the use of Khadi. He deprecated the idea of living luxuriously and making use of foreign clothes. The Charkha, he said, was not meant to compete with mill-made cloth or Manchester or Japan goods. It was meant purely for a village industry, a cottage industry. They took to Khadi not out of hate, but because they wanted to achieve their salvawith Swaraj was because the man who had learnt to love his Khadi had learnt to love his Motherland.

PENSION IS ASKED

FOR LADY WILSON Special from Monitor Bureau LONDON, April 9-Vigorous protest

is being prepared by friends and fol-lowers of the late Field Marshal Sir Henry Wilson against the decision of the imperial authorities by which they refused a pension to Lady Wilson refused a pension to Lady Wilson. The Ulster Association has issued the fol-

The imperial authorities having re-fused the late Field Marshal Sir Henry Wilson's pension to his widow on the ground that he did not die on active service, the Uister Unionist members of the Imperial Parliament are taking the the Imperial Parliament are taking the matter up with the Government with a view to having the decision altered.

They hold there are at least three good reasons for having the matter reconsidered. The first is that a field marshal of the British Army is always on the active list; the second is the fact that the late Government having treated with the Republicans gave the latter the equivalent of a war status; while the third reason is that the recent deportations of Republicans from while the third reason is that the re-cent deportations of Republicans from England and Scotland show that the British Empire still regards those peo-ple as enemies, and that, therefore, a field marshal having been slain by them, his widow must receive the same pen-sion as if he had been killed on the field of battle.

MUSIC OF THE WORLD

Granville Bantock, Composer, Scholar and Practical Showman

New York, April 19

CRANVILLE BANTOCK, the British composer, as I made him out when taking with him at his hotel here, thinks that music, instead of being a form of priting used to embody the abstract, addemic, technical notions of an individual, is a mode of sound employed to express the emotions of a provided to express the emotions of a provided to express the use of following the composition of the compos mode of sound employed to express the emotions of a crowd; that instead the emotions of a crowd; that instead of being something to be shut up inside the covers of a book it is something to be unfolded and disclosed in an auditorium; and that instead of being a number of black dots printed on paper for an occasional reader to pore over, it is a succession of sonorities produced by voices and instru-ments for a multitude to hear.

In other words, Mr. Bantock, though scholar, a professor and a philosopher, is nevertheless a practical showman. He may retire for certain periods to the quiet of his study and the soli-tude of his writing-desk; but when he comes forth, he wants the company of the populace. He may write a big score in the modern style, and the Carnegie Trust may publish it and leposit copies in the British Museum and the Library of Congress. But were the writing, publishing and de-positing to be the sum of the story, he would rather, I am sure, have spent his time training a working people's choir to sing some old Scottish ballads, English madrigals and German motets, or teaching a conservatory class in orchestration.

Competitive Festivals

For unless I am a poor judge of artistic character, he finds it the height of happiness to be where things are going on; to be where singers and players are performing at the top of their skill and where the public is listening with keen enthusiasm and discriminating attention. Whether the scene of action be an opera house or a concert hall is, according to my in-terpretation of his remarks, all the same to him. To consider the point in the light of what he observed about one of his recent vocal compositions, of which the Song of Solomon constitutes the main text and certain of the Psalms the interludes—he explained that he had intended the work as a musical drama, and that he wrote for the stage, with the king, the Shulamite, the shepard, the attendant and the watchman as the principal personages; and he noted that he had been able to secure a presentation of the first part only, at Gloucester, and that it had to be done in concert form. But far from showing any feeling of regret over these compromises, he spoke in terms of high satisfaction with them, as making the piece precisely fit the requirements of an English festival.

To tell how the case truly stood, Mr. Bantock was not primarily interested in his compositions. He pre-ferred to discuss competitive festivals, in the cause of which he has come to America. He has served as adjudicator in numerous contests in Great ists, incorporated in January, 1920, is Britain in recent years, and he will have the same rôle in meetings which are presently to be held in representa-30; to Winnipeg for a week, beginning the harp (both among harpists and in May 7; and thereafter to Edmonton the musical or general public) it does for three days, to Prince Albert for three days and to Vancouver for three

favor in the United States. I believe executants, and at the same time it if they were started here you would connects itself with wider spheres of if they were started here you would find more people taking an interest in music than take an interest in it now. You would not have to drive them to concerts; they would go. At any rate, that is what would happen if things got going as they are in Great Britain. We have at present 150 festivals, mostly in the big towns. The first week of March, I adjudicated at Londonderry, Ireland, where three poser to hear his works performed packed all the time. Evidently the which would be almost an impossi-

money prizes and we merely give cer-so much definite in its modernism as tificates. Thereby we have idealized precise regarding the nationality of our undertaking, making it a sort of the composers. That is, it considers revival of the Greek Olympic confor performance nothing but works tests, in which a laurel wreath was written by American citizens, either the prize. High Standards

"At Birmingham last summer, we had 11,000 competitors all told, including the members of choral groups and solo vocalists and instrumentalists. competitions than I have in recital halls, by renowned artists. We mark the contestants on a scale of 50 per cent for points of technique, such as accuracy, time, rhythm, tone, interesting the works, and this may be regretted, for in art, works should count, not artists; and a true American work of art is a work that embodies the spirit of America, whatever the nationality of its progenitor happens to be accuracy, time, rhythm, tone, interesting the state of the works, and this may be regretted, for in art, works should count, not artists; and a true American work of a true American work of a tru You may regard it as hardly possible accuracy, time, rhythm, tone, intona-tion, articulation and phrasing, and 50 per cent for interpretation and general effect; and I have known the indi-viduals of a class of 45 contraltos in a little village in Lancashire to do so well that but three of them went be-low 80 per cent. Five of them did so well that they had to be heard over again. They sang with a sincerity that moved me profoundly, and I suppose they had never attended what we call

ohn Peter Grant TEACHER OF SINGING PUBLIC SPEAKING Bldg., 638 South Fourth Ave. LOUISVILLE, KY.

a concert. What does William Byrd, the Elizabethan composer, say in the

Mr. Bantock told me his views on the use of folk melody in symphonic music, which was really what I intended to ask him about more than anything else; but I will reproduce them only so far as to note that he said it matters little whether a composer hyprowa historic altra directly. poser borrows historic airs directly or invents themes of his own in the folk manner. He referred to the Russians of the nationalist school as using both methods; and he mentioned Sibelius as making a success of the method of invention and as within method of invention, and as writing symphonies and short orchestral pieces that are Finnish in sentiment though not historic in their actual material. He spoke of Sibelius as hav-ing first visited England on his invitaing first visited England on his invita-tion, conducting the tone poem, "Fin-landia," at a concert of the Liverpool Orchestral Society. He recalled, speak-ing a final word of himself, having been in New York for a while as conduc-tor of Edwardes' "The Gaiety Girl" company, a good many years ago, when the center of the town was at Union Square instead of at Forty. Union Square instead of at Forty-Second Street. He was interested in having found a Broadway hotel where some excellent Japanese prints hung in the rooms; and he assured me he could vouch for their value, having collected such things himself. He told me that he was on leave of absence from his post as Peyton professor of music at the University of Birming-ham and as director of the Birming-ham and Midland Institute of Music, where he has charge of 1600 students. From everything he said I knew he was prepared to enjoy his American was prepared to enjoy his American holiday; and from a word or two that escaped him just as we were saying good-by, I felt certain he would make racation long enough to enable him to appear in concert here at the beginning of the next music season.

The Guild Idea in America, and the New Music

have witnessed in New York the formation of three musical ororganizations which, though embodying outwardly very different aims, yet callty requires, in order to assert itnite conditions of musical organiza-may be said to be manifestations of a self, new conditions of existence; they similar urge becoming more and more intense in the world of music. I speak here of the National Associ-ation of Harpists, the guiding hand of which is that of Carlos Salzedo; the International Composers' Guild, founded by Edgar Varèse, and the American Composers' Guild, constituted by some of the most prominent

American composers of today.

The National Association of Harpin fact if not in name a guild of harpists. It includes, however, composers are presently to be held in representa-tive sections of Canada. He goes to Toronto for a week, beginning April 30; to Winnipeg for a week, beginning to Winnipeg for a week, beginning to Edward the harp (both among harpists and in not limit itself altogether to this how momentous our present age is. specific object. It publishes a maga-vine, Eolian Review, in which all sub-go back further, when Rameau, Bach Appeal to Public zine, Eonan Review, in which all subjects pertaining to the new and product and Gluck appeared, ushering in the gressive world of music are discussed. new music of the nineteenth and of the eighteenth century respectively,

sions were held, and the hall was and gain contact with the public, packed all the time. Evidently the public liked the festival, for its support was complete. The second week of the month I adjudicated at Plymouth, England, and the third week at Leeds.

"I find the responsibility of hearing contestants and helping place them in order of merit somewhat severe. But inasmuch as everything is done according to standards understood all round to start with, the decisions usually prove satisfactory. The British festivals are federated and the same rules apply in one locality as in another. We have done away with money prizes and we merely give cermilar of the same rules and we merely give cermilar of the same rules and we merely give cermilar of the same rules and we merely give cermilar of the same rules and we merely give cermilar of the same rules and we merely give cermilar of the same rules and we merely give cermilar of the same rules and we merely give cermilar of the same rules and we merely give cermilar of the same rules and we merely give cermilar of the same rules and the same rules and we merely give cermilar of the same rules and the same

written by American citizens, either native or naturalized. The national-istic element may antagonize some artists, yet the very fact that naturalized foreigners are accepted broadens its horizon. However, here the emphasis is put on the status of the composer, not on the universality of the works, and this may be regretted,

Now the successive appearance of these three musical guilds in the course of two years indicates that a

By D. RUDHYAR | slow change is taking place in the multiplication of unusual ensembles, 7ITHIN the last three years we musical world of today. This change, bringing together a few instruments of though not consciously realized as yet, all types. These polychromatic commay be interpreted thus: Musicians binations, changing the tone-color for whose outlook is truly progressive and every new composition, require, in vital begin to feel that a new musi-order to be well presented, very defibegin to realize that the musical evo-lution of these last decades has the guild, as a modernized concepreached a point where it has become tion, provides both for executants a revolution, and therefore needs to manifest itself as such outwardly. The hearsals can be obtained from memspringtime of the new music is approaching and its vernal power must the sake of the guild's ideal, if they express itself in the building of new are true guildmen. Also amateurs forms animated by a new purpose, in the world of men as well as in the world of sounds. In other words, new aggregations of sounds constitute but one part of a general musical renova-tion affecting the lives of all musitants, and incapacitating old institutions as vehicles for expressio

This is an important point, and the fact that it is recognized, even though unconsciously in most cases, shows great as the musical changes were they did not affect profoundly lives of the musicians. Truly it was romanticism that brought about the tremendous growth of orchestras, yet this affected but slowly the conditions of musical production. It is only during the last 20 years that orchestras have become big commercial concerns proletarianizing the musicians.

Growth of Small Ensembles Today something more essential is occurring. The new music needs radically different social conditions, in which to be produced. Virtuosi cannot give it satisfactorily, because no single instrument can contain it. Big orchestras are unable to perform the new works of today, when they really express all the modernity of music. They will be utterly inefficient as vehicles of expression for the music of the future, if it accepts the ideals of ancient music. As proof of this assertion witness the growth of small orchestral combinations. From Schönberg to Bliss and Varèse we see the

The Appeal of the Clark Harp An Appeal to the Most important is it to have teachers whose minds are trained to impart their knowledge. The human race of today is unconsciously craving music—it's an uplift in life—it's a stimules of progress. To those who have a basic knowledge of music, the Clark Harp offers a wonderful opportunity for atndio portunity for studio work which remunerates rapidly and amply. Let Clark Harp, \$150 us tell you about it. CLARK MUSIC CO.

Melville Clark, President 418-80 South Salina St., Syraouse, N. Y.

of music will support a guild by yearly contributions, even if they are too busy to attend all concerts. Composers will be encouraged in writing new works, in which they will dare to be themselves, because they know that such works will receive adequate care, which is hardly possible in the case of large commercialized orchestras, which often destroy individual musicianship in their members.

The Co-operative Ideal In other words, a true guild brings about co-operation instead of a mercantile exchange of sound for money it destroys the virtuoso idea of selfglorification and puts in its place a group ideal. It impersonalizes music and produces a state of relationship of relative understanding between those who conceive and those who execute. It creates new social values and these values are manifestations of the same fundamental impulse, generating at the same time a new musi-

This impulse is being felt but imperfectly at present. The springtime of the new music, the centurial spring, the second quarter of the great centurial year (1925-1950) have not come as yet; but the equinoctial breezes are already stirring. Musicians respond to the indefinite longing for the new and work for new things. And so guilds begin to come into existence. But they are still incomplete; for the ideals which they embody are not strong enough to bring about perfect co-operation between composers and executants. Yet many executants of fame have been giving their service freely to the composers' guilds, and composers have found that a closer bond still should unite conceivers and executants, for no work of art is achieved, which is not made alive as a sonorous reality—that is, performed. And we must realize that the union of composer and executant in one per son which prevailed for many centuries in many lands, for instance in the Germany of the meistersingers' guilds, is probably not a useless relic of olden days, but may be resuscitated at the call of the new music. The first step oward such a union is to educate executants musically and otherwise, to reverse the process which made of them proletarians, to strengthen the ond of understanding between them and composers.

"Polly" and Stolen Goods

London, April 14

FEW months ago the Moscow paper "Krelistcha" achieved the following delightful "howler": "On Nov. 2 in London the thousandth performance was given of an opera performance was given of an opera written by an eighteenth-century beggar called Hammersmith. It was revived two years ago. Another eighteenth-century opera, 'Polly,' by an equally famous composer, Kingsway, that an infatuated, instellectually lasy on listening to the equally famous composer, Kingaway, will be revived shortly."

"The Beggar's Opera" is still drawing audiences to the Lyric Theater, ing audiences to the Lyric Theater, Hammersmith. "Polly," a sequel, celebrated the one-hundredth performance at the Kingsway Theater before it was transferred to the Savoy. Nothing succeeds like success, and the eightenth-century flavor of these musical pieces has proved so acceptable to the taste of the English public that another "Polly," also "after" Gay, has just made her curtsey at the Chelsea Palace Theater. A third "Polly" is touring the provinces.

Whether the popularity of "Polly"

Comedy was evolved—that malignant locust disguised as a butterfly which has preyed on us ever since the passing of Sullivan. . . And even in the full blast of these revivals, with as we see, a prospect of endless similar ones ahead of us, a protest should be registered by those who care supremely about the upgrowth of fresh indigenous music in their country."

Dr. Smyth says she cannot help feeling that a Sullivan in the hand is worth two Byrds in the bush.

That some protest is necessary none

doubted. Is there any real necessity to pillage the eighteenth century and display what are largely, after all, stolen goods, tricked out by clever stage degoods, tricked out by clever stage designers, who, in the words of an enthusiastic fashion expert, clothe their chorus girls with "the startling brilliance and grace of sunlit tulips blown by the wind." Why not give the twentieth-century beggar a chance? Alas, there are still, as Dame Ethel Smyth reminded us recently in an article, "Music and Mawk," many other bygone English composers, who similarly built stories round the ex-quisite popular tunes, folk and other-wise, that we, like every other country, possess, and called the result operas.

Whether the popularity of "Polly" and the "beggar called Hammersmith" can doubt who has visited the Chelis altogether an unmixed blessing to sea Palace. As a work of art this contemporary English music may be particular "Polly" strikes one as designed rather to be seen than heard. Hubert Bath's presentation of the old airs, and some new ones of his own, is not conspicuous for a sense of style; and his frequent jumps from the eighteenth century to the nine-teenth give an impression that he is more at home there. The dullness and lack of color of the orchestration, with its excessive use of muted brass, sounds throughout the three acts a perpetual reproach to the brightness and glitter of the stage.

Curiosity and Benvenuto

A RECENT writer discourses of the increase in the publication of biographical and autobiographical writing, attributing it to an increase of curiosity on the part of readers. "The average of good biography," says he, "grows steadily, and this was but excessive vanity," says he, "grows steadily, and this is because we are more curious. It was curiosity that made the Elizabethan period, that caused that flowering immediately after the French Revolution. And here we have a new curiosity, not of discovery, but assuredly in other ways, in art, in government, and particularly in living."

He was to disappear, however, far to soon for that. And though I like sometimes to think he might have over the necessary penmanship. He reflected that he "was losing too much time, and this was but excessive vanity," so he continued by dictation to an amanuensis. He worked at whatever he had on hand while he dictated and took much pleasure in the combination. And-thus dictating he set of paper a panorama of his life and personality, his travels and adventures, his dealings with great and personality, his travels and adventures, his dealings with great and prominent personages three hundred dod years ago. His method, if he had any, was to tell what he remembered, and he made a remarkably convincing and picturesque autobiographer was fity-too soon for that. And though I like sometimes to think he might have worked his miracle, I know that I am bilinking facts. Still, a little he did teach me of his close companioning with earth. That trees were not to an amanuensis. He worked at whatever with the method, the interpreted alone by outline and by color, but by an understanding of their growth. There was the timidity of apper a panorama of his life and personality, his travels and adventures, his dealings with great and personality, his travels and adventures, his dealings with great and particularly in the head on hand while he dictated and took much pleasure in the combination. The particular is a listened to the hallows of their score ernment, and particularly in living." It may be so: my own thought, as of one who tries to be a gentle reader in this twentieth century, when the volume of print makes it more and more difficult to read anything gently, neither disputes nor leaps gladly forward to accept this opinion. Its tendency is to hesitate at generaliza-tions, and wonder, for example, whether there was a general curi-osity that made Renaissance literature or whether a general curiosity grew out of it. One may at least susct that when a large number of readers turn with interest the pages of a biography, it is because the author of that biography has someow succeeded in making it as interesting as a novel. Perhaps, after all lography is a constructive art, and excellently written biography something of a work of fiction with considerable assemblage of "facts' to give it artistic verisimilitude.

Autobiography, it might seem, would be written from a more definite knowledge of the subject; but who shall say for certain that the autobiographer has truly indicated, or even suspected, the genesis of his behavior on this or that occasion, or is able fairly and accurately to balance accounts between himself as author and himself as material? All of which detracts nothing from the pleasure and profit of reading biography or autobiography, but merely admits that no man possesses wisdom and insight into another's history or even his own. Benvenuto Cellini very likely thought himself sincere when he wrote to Benedetto Varchi, who had read part of the manuscript of his Memoirs, "I do not wish to weary you with a wretched trifle like this"—but the modesty of the wish, coming from Benvenuto, leaves its sincerity some-

what open to doubt.

Benvenuto began his autobiography because he was of the opinion that i was the proper thing for a man to do.
"All men, whatever be their condition, who have done anything of merit, if so be they are men of worth and good repute," he says, "should write the tale of their life with their own hand. Yet it were best they should not set out on so fine an enterprise till they have passed their fortieth year." The

Editorials

Viewed in the light of recent history, that was an amazing—a revolting—spectacle presented at a dinner

The Entwined
Flags and
the Bacon

in a New York hotel, night before last, when the Stars and Stripes and the Turkish Star and Crescent were wreathed together over the speakers' table, and a retired admiral of the United States Navy vied with a

United States Navy vied with a Turkish Bey in eulogizing Turkey, and expressing contempt for Great Britain and for Lord Curzon, who represented that Nation at Lausanne.

Only a few years ago the leaders of the Moslem Nation, now eulogized by this group of concessionaires at New York, were fighting savagely to impose on the world the hegemony of Germany. United civilization, world-wide Christianity, opposed them. By the Turkish action at that time the war was prolonged at least two years. Had the Turks not succumbed to German pressure and German cajolery, the United States never would have been forced into the war, for the conflict would have been ended before it became necessary for that Nation to intervene for its own self-protection. To the Turks, almost as much as to the Germans, is due the war debt and the war taxation under which the United States now labors. What the Turk meant to Christian civilization during the war is well told in former Ambassador Morgenthau's book of reminiscences of his service as United States representative at the Sublime Porte. It meant murder, wholesale assassination, massacre, looting, and rapine. We observe with interest that Ambassador Morgenthau, who saw the Turk near at hand, did not sit under the entwined flags at the dinner of the concessionaires.

But it is not necessary to go back to the period of the World War to find a striking contrast to the harmony of the concession seekers. If Admiral Chester, who seems to be persona grata to the State Department, will ask the Secretary of State of that official's experience during the period when the Turks were sweeping over Angora with fire and sword, completing there the work of extermination of the Christians which they had so successfully prosecuted in Armenia, he may learn some facts that were not brought out at his promotion dinner. Never was the State Department so overwhelmed with letters of appeal and of protest from the Christian people of the United States, from the churches and the philanthropic societies of the American Republic, as in that moment of Turkish triumph and blood guilt. Never has there been a more united or more widespread appeal for action by the United States to check the Turk in his devastating progress back into the Europe from which it was thought that his exemplary defeat in the World War had expelled him, as then. There was no response from the State Department or from the Administration. There are many who believe that a word of protest and a gesture of defense, taken in accordance with the sturdy British stand at the neutral zone, would have brought Turkish arrogance down to earth. But the protest was not voiced nor the gesture made.

Now, in pursuit of what a Turkish spokesman at the dinner of the concessionaires called "the bacon, and pretty fat, juicy bacon at that," the Government of the United States is to be dragged into relations with Turkey, against which the conscience and the intelligence of the American people will revolt. For fat contracts in railroad building and in the development of ports, and for a share in the Mosul oil fields, it is urged that the Stars and Stripes and the Star and Crescent be lovingly entwined, and that the United States set itself sharply in antagonism to its former allies, France and Great Britain, who claim prior rights in the same territory. Is it possible that this hunger for fat and juicy bacon, this appetite for oil, is to be permitted to entangle the Government of the United States in the most perilous adventure in dollar diplomacy that history has ever recorded?

ERECTING a monument to a pest is rather a novel undertaking, but it is precisely what the people of Enter-

The Boll Weevil as Benefactor prise, Ala., have done. In the center of their public square they have put a drinking fountain for horses, with a monument in the center bearing a tablet announcing that it is erected "In profound appreciation of the boll weevil and what it has done as

the herald of prosperity." One might at first think this a piece of satire, for the first result to the southern states of the appearance of the boll weevil was a crushing disaster. The very first year it appeared it cut the cotton crop in the county in which this monument has been erected 60 per cent. All through the cotton country it added enormously to the expenditures of the farmers for labor and for various forms of chemical sprays used in combating the pest. For a time it seemed as if the southern states affected would be driven into bankruptcy.

What really happened, however, was that the planter who had long devoted his attention to cotton alone diverted his efforts to raising other crops. With this diversity of products came a new prosperity to the country which had been facing the prospect of bankruptcy. Not only has the general income been increased, but the new system of farming is breaking down the old practice of mortgaging the cotton crop in advance, which made the small farmer practically the serf of the money lender.

The monument to the pest erected at Enterprise tells its own lesson. It is dedicated to the boll weevil, but as a matter of fact it is erected in celebration of the resource-fulness of the American farmer, which enables him to turn from a losing fight against one evil and to concentrate his efforts on the development of a new line of productive industry, upon which that evil can have no hurtful effect.

WILL Great Britain go forward with her mandatory work in Mesopotamia? Or will it make such arrange-

ments as may be with the League of Nations and give over that handicapped task? The query is neither the least important nor the least interesting of the many propounded by today's unsettlement through the Near East. And the answer is not yet. Of

Is It to Be
"Back to
Basrah?"

a Monday Dame Rumor appears in Fleet Street to whisper that the "Back to Basrah" cry is to be heeded, but on Tuesday that undependable lady flatly contradicts herself. Meanwhile the world wonders. It is no small matter which is at stake.

The British mandate in this unquiet cradle of the world was granted logically enough. Britain was in occupancy when it was given out. It had large interests there, not the least being the safeguarding of the road to India. It was experienced, too, in handling such folk as people this "Land Between the Rivers." It is to be added, though, that the action of the Council, in its bestowal on Britain of a temporary control of Irak, has not been ratified by the Assembly. Going ahead with the work, however, the English have restored order to the cities and larger towns, if not as yet entirely to the countryside. Baghdad is a new place, though no less picturesque than in the spacious days of Haroun-al-Raschid, and Basrah is become a port in a very up-to-date sense of the word.

So runs the tale, quite usual where western initiative grapples with eastern stagnation. But the Arabs are restless—and worse. As to just what a "mandate" is they are not exactly clear, but they realize it implies inferiority, and that touches to the quick an immemorial pride. The setting up of a king of their own kin, the continued increases of autonomous powers, even last October's treaty (as if with a fully sovereign state), these developments have failed to beget satisfaction. Things have an uneasy feel, with open recalcitrancy lurking just around the corner-nor would it be only the natives of the valley who would take the field, should trouble develop; that lately formed "Arab Confederation," with the Hedjaz and Syria, Palestine and Yemen, ranged alongside Irak, certainly would seek to uphold the hands of Feisul's people. Now this combination of wide improvements and the maintenance of an adequate military force imposes a steady drain upon Britain's treasury, and that is one thing which the entirely levelheaded Englishman knows he cannot stand at present.

Two methods of retirement have been proposed by those who urge that step. By the one, Great Britain would apply to the League, under Article 22 of the Covenant, for release from its present obligations. By the other, it would support Irak's application for membership in the League. In that case, as an obviously sovereign state, Mesopotamia would cease automatically to be a mandated area. In that case, too, England would "save face"—for to follow the first course would wound deeply its prestige through all the Muhammadan world. On the other hand, this second plan would seem not less than impossible in that no native government could reasonably be expected to procure and maintain settled order.

Yes, here is matter of more than mere interest to today—and there are many, not at all personally concerned, who hope that some way will be found along which Great Britain may press on in its present usefulness, despite whatever obstacles.

THERE are indications that the growth of the feeling of political equality among the people of Porto Rico is

Porto Rico and Statehood to make anything but easy the lot of any governor who may be delegated to represent in the island the Administration whose official spokesman he must be. The people there are divided into somewhat unequal political factions. While the desire of the

islanders is either for ultimate political independence or for full statehood under the American flag, it seems that the urgent demand is for an immediate change in jurisdiction over the affairs of the island in Washington. At present the control of the government is in the hands of the War Department, the same as the control maintained in the Philippines. The desire of Porto Ricans is that this control be transferred to the State Department.

It is important to take note of the fact that, despite the years during which the United States has kept a watchful eye upon affairs in the island, and despite the material progress which has been attained under the stable conditions assured, Porto Rico remains more Spanish than American in its general characteristics. This is not particularly reassuring to the people who have hoped to bring about the gradual Americanization of the society, the schools, and industry generally, neither is it entirely complimentary. Such a condition does not tend to assure the continued welcome of any representative sent to administer the affairs of a directing and protecting government, and it is already intimated that while Governor Towner, who but recently assumed his official duties, was cordially received, his way will be made pleasant or difficult according to his determination to favor or to oppose purely insular policies.

THERE are few individuals better known for their understanding sympathy with young folks than Judge

Judge Lindsey

and the

Lying Child

Ben B. Lindsey of Denver, Col., so that when he tells his views on such a subject as "Why Children Lie," as he did recently at a lecture before the Polytechnic High School in San Francisco, it may be taken fairly well for granted that he will say some-

granted that he will say something worth while. The greatest cause of lying among children is fear, he declared on this occasion, adding that in his opinion parents are responsible in most cases for their children lying, because they do not know how to lift the spell of fear. Parents must learn, he said, to substitute the desire to do right for the fear of getting caught and punished. As it is, however, "the child is taught primarily through fear, and fear is the father of lies."

Judge Lindsey did not confine his attention entirely to this cause of lying in children, however, for, as he sees it, misdirected loyalty; energy and imagination combine to elicit this response in many instances. For example, a boy will lie to protect his chum, acting under that ancient law of his gang world—thou shalt not tell on thy friend. Or, again, parents are often tyrants; they command, that is to say, instead of attempting to convince. Why? Partly because it saves them energy and time. If, however, a child is threatened with punishment, in self-defense he lies, having no real judgment to save him.

The judge did not mince words in driving home his lesson to parents. "It is hopeless," he said, "to create a truth-telling child of parents who do not know how to get at the truth. The truth is a hard thing to get, when fear forbids it being told." Hence the parents must take time and patience to get at the truth, they must instill a love of the truth for the truth's sake. They must not judge too hastily as to guilt or innocence. Parents would never forgive in a judge, he said, the quick decisions they themselves make as parents. And parents must realize that primarily they are responsible for this unfortunate tendency in their children.

COMPETENT judges, according to a notice sent broadcast to American composers, have been appointed to pick

The Question

Competency

out the most worthy pieces of new orchestral music from among those submitted to the Philharmonic Society of New York, and to assign them a place on the programs that are to be given at the Lewisohn Stadium the coming summer. The board

to quote precisely.

of arbiters is to receive manuscripts until June 1, when the reading and selecting will begin. The board is to consider works of moderate length only, on the idea, forsooth, that twenty-five minutes or so of American music is all that an ordinary open-air audience will want. Who the actual members of the jury are, the announcement does not disclose. It seems to be enough that they are to carry on their labors under the auspices of the organization known as the Stadium Concerts, and that they are vouched for as competent; or "most competent,"

Competency, without doubt, is a desirable quality in those who officially determine the value of musical scores, provided it is not of too special a kind. To note examples, there is the competency of the person who knows his Brahms down to the ground, and who pronounces all music good which reminds him of the style of the symphony No. 1 in C minor or of the "Academic" overture. Again, there is the competency of the one who knows his Debussy to the faintest breath of impressionistic tone, or his Stravinsky to the last refinement of contrapuntal harshness, and who finds everything significant and expressive that whistles down the afternoon breeze like a faun, or that whizzes across the evening sky like a firework. In fine, adjudicators who merely possess a thorough understanding of a particular school have a tendency to favor imitativeness, if it is the least bit brilliant, rather than originality, if it at all lacks pretentiousness. The experience of prize competition awards has only too often proved how easily artistic lumber can be mistaken for artistic timber.

Possibly the Stadium Concerts committee would do well, all things considered, if they reduced the force of the adjective with which they describe their judges, and if they came down from the superlative to the positive degree. Some sensitive American composer who feels that he has an individual message for his fellow-countrymen may have learned how difficult it is sometimes to make "the most competent judges," especially if they are of the academic type, hear anything beyond Brahms, Debussy, and Stravinsky; or, more broadly speaking, anything non-German, non-French, or non-Russian. And he may, accordingly, withhold his manuscript. But better, probably, than bothering with a single word, the committee should enlarge upon their communication, publishing the judges' names and letting the matter of competency be determined by general opinion.

Editorial Notes

THE discussion on the subject, "Is Laughter a Declining Art?" which took place the other day at the annual dinner of the Arts and Sciences, held in New York, recalls a comment that Lord Chesterfield wrote in his letters to his son, under date of March 9, 1748, somewhat along the same line. This was his advice:

Having mentioned laughing, I must particularly warn you against it; and I could heartily wish that you may often be seen to smile, but never heard to laugh, while you live. Frequent and loud laughter is the characteristic of folly and ill manners: it is the manner in which the mob express their silly joy at silly things, and they call it being merry. In my mind there is nothing so illiberal and so ill-bred as audible laughter.

But still the world laughs on, as it sees fit, despite comments pro or con.

When the British Postmaster-General appointed a committee recently "to consider in the light of recent progress in wireless science the possibility from a technical standpoint of transatlantic wireless telephony of sufficient reliability for commercial use, . . ." he took a step which in the years to come is likely to be remembered as marking an important milestone in the march of the world's progress. With the authorities in the United States willing and anxious to co-operate in any studies aiming at making such communication a success, it cannot be long before talking across the Atlantic will be hardly more a matter of comment than is the ordinary telephone conversation today.

Glamis and Its Story

This castle hath a pleasant seat; the air Nimbly and sweetly recommends itself Unto our gentle senses.—Shakespeare.

GLAMIS CASTLE has again sprung into prominence. It is perhaps the most talked-of baronial residence that has survived decay in Scotland. The ancestral home of Lady Elizabeth Bowes-Lyon, whose marriage to the Duke of York is to be celebrated in Buckingham Palace on April 26, has been asleep, so to speak, for years, but the sudden announcement of the betrothal of a daughter of the Earl of Strathmore to a member of the royal family aroused it from its slumber and started the mansion to throb with new life.

All the quiet highways that skirt the village of Glamis (pronounced Glahms) are alive with traffic. Visitors from "over the border" and across the seas are piling in by road and rail, and the old Newtyle-Alyth line is rumbling with the burden of tourists intent on seeing the ancient building of feudal times and the village, with its interesting relics. From the influx the villager who, when winter evenings were long, carved Tam o'Shanter and Souter Johnie on the legs of an armchair and depicted in wood other characters that Burns has made household words, will reap a harvest of no mean dimensions.

Scottish history draws sustenance from the Castle of Glamis. There Shakespeare lays the scene of "Macbeth." There found refuge the Gaelic-speaking kings Malcolm, Duncan and the great Canmore. There slept the Pretender and King James, Queen Mary's father and the hero of the "Lady of the Lake." 'There also resided Scotland's premier novelist, Sir Walter Scott, and a long list might be made of the celebrities in song and story, whose names are associated with the historic structure.

Girdling the ancient castle are extensive grounds that reach Glen Ogilvie, with its heather-covered hills, and its purple slopes, that command a wonderful view of the Grampians, unsurpassed in grandeur, that embrace villages of charming old customs and that hum with the song of winding stream and tumbling waterfall. On the water's edge bracken and fern spring up in luxurious array and vie with the wild flowers in coloring the countryside.

Of the traditions of the castle much might be said. Who has not heard the story of Malcolm II? Is there not a chamber in the castle known as "Malcolm's Room," to which access may be gained from one of the three staircases that circle the inside of the tower? Who has not heard of the fate of Duncan, King of Scotland, in 1033? And who is unacquainted with the architectural secrets of Glamis?

Probably most people know of the mysterious chamber, the entrance to which is known to only three persons at one time—the Earl of Strathmore, the heir-apparent and the factor on the estate. Tradition says that within its walls the Earl of "Beardie," the fourth Earl of Crawford, was confined, doomed as "penance for a hasty vow to play dice until the Day of Judgment."

Lovers of legendary lore cling to their belief in this tale, although an authentic record long ago exploded it. It would, however, not be correct to assume that there is no secret chamber. On the contrary, there is the best authority for stating that such an apartment exists, and that its entrance is concealed, though the story of Earl "Beardie's" connection with it is a popular delusion.

In 1654 Cromwellian soldiers encamped for a short time at Glamis and made free with the castle, while the Earl was a minor. For his father's refusal to deliver up King Charles to the English the son was fined £1000, a penalty that naturally embittered him against the Commonwealth. But the incident in itself, while interesting, is not unique by any means, as the castle has at different times been the refuge for royalty in exile.

Legends of the castle abound. One of the least known concerns a crumbling stone wall built on a moor not three miles away from the village of Glamis. This wall is supposed to be the original foundation of Glamis Castle. Work on it had to be abandoned as, like Peter Pan, it would not grow up. Toil as they would day after day, masons and laborers found the wall rise no higher, the foundation having sunk overnight to the height of the morning before.

Unable to account for the phenomenon, the workmen continued to build and the wall continued to sag. One day a note was found near by on which were inscribed words explaining the futility of the site chosen and suggesting that the edifice be constructed "down by the Dean." Struck with the import of the lines, the builder gave orders to transfer operations to the riverside, and there the castle stands today.

This is but one of many tales that surround the castle, the origin of which is lost in obscurity.

The castle itself resembles a sixteenth century French chateau and is built of rich red sandstone with walls that are in places over ten feet thick. As you approach it the most striking feature is the quarter-circle tower, from which two wings extend at right angles to each other. The tower is seven stories high, and affords access to the divisions of the building. At the base of the tower is the main doorway and at its summit a wooden clock dial bears the date 1811. Picturesque turrets are grouped around the upper portion of the tower. The central part of the castle, which is the oldest, rises much higher than the side wings.

With its vaulted crypt and palatial halls, the castle is of immense interest to the historian. It contains many rich tapestries and valuable paintings, and the coats of mail and relics of the hunt and of older days throw light on a past that is invested with facts stranger than fiction.

Civilization Moving Ever Northward

Three thousand to 4000 years B. C. the center of civilization was in Upper Egypt, where the mean temperature is 76° F. Four hundred years later it had moved to Lower Egypt, with a mean temperature of 70°. Following retreating glaciers it continued northward and in the first century A. D. we find Rome, with a mean temperature of 60°, the center of civilization. Today London, Paris and New York, having a mean temperature of from 48° to 50°, are supreme.

History is made rapidly these days. As recently as 1763 Voltaire described Canada as "15,000,000 acres of snow." Today that "snow" is the second largest food-producing country in the world. During 1922, a corn show held in northern Ontario proved to be the biggest event of its kind ever held on the American continent, in both point of attendance and exhibits surpassing by a wide margin the International Show at Chicago. Speaking at this show, Professor Champlin, the international corn expert, said, "I once thought that North Dakota was the northern limit of the corn belt. This show has proved that excellent corn can be grown several hundred miles further north than was believed possible twenty years ago. The Yellow Dent that captured the first prize is the equal of any corn of its kind I have ever seen."
